the invitation to write a foreword for this book came at an opportune time in the development of the field of psychedelic assisted therapy amid the emergence of the future iteration of mental health services delivered by the promises of the psychedelic renaissance also alive in this context are the substantial individual social and cultural repercussions of a global pandemic on mental health and human behavior a growing body of research shows encouraging clinical results in treating trauma depression demoralization end of life existential issues addiction and eating disorders using mdma psilocybin ketamine and other psychedelic medications however the field of psychedelic assisted therapy has gained accelerated support from donors the medical establishment and corporate investors in recent years along with the enthusiasm recognition funding and media coverage directed toward psychedelic assisted therapy ethical standards the lack of adequate training and issues of accessibility sustainability diversity and inclusion are increasingly becoming part of the movement s forefront these gaps in the emerging field highlight the need for more guidance and structure around ethical clinical and social considerations for these innovative treatments this book can serve

as a cornerstone for the field of psychedelic assisted therapy at this time this essential contribution offers a depth oriented somatic and relational therapeutic approach emphasizing the imperative of ethical standards the relevance of the therapeutic use of touch the significance of the unconscious in the construction of symbolic meaning and intersubjective processes and the need for trauma informed approaches while centering liberation psychology and decolonial practices the topics covered in this book and the themes embraced by the authors are of great relevance and are not yet comprehensively articulated in existing publications on psychedelic assisted therapy the diverse authors of this book approach their chapters based on their diverse social and cultural identities as well as their extensive clinical experience providing psychedelic assisted therapy in government approved clinical research private practice and nonprofit organization settings their contributions aim at a vision of psychedelic assisted therapy centered on decolonial practices attuned to the somatic imaginal cultural and relational dimensions of being allowing the emergence of transpersonal processes each chapter elaborates practical and theoretical aspects of this treatment modality through a unique theoretical framework providing inspiration and guidance to readers working in this field as well as those compelled to psychedelic work for personal transformation

psychedelics are part of a resurgence of interest in consciousness studies especially as altered states of consciousness are being re examined in the context of psychedelic assisted therapies to date discussions about psychedelics in modern medicine have been dominated by studies in biomedicine however given that cultural factors play a significant role in the subjective effects of psychedelics psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences these non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences

integral psychedelic therapy is a groundbreaking evidence based collection that explores how psychedelic medicine can be incorporated into contemporary psychotherapy this book builds on current psychedelic research by providing an in depth articulation of the practice of psychedelic therapy weaving together a variety of complementary therapeutic frameworks case examples and practical guidance for cultivating a highly effective ethically grounded integral approach chapters by a diverse set of practicing psychotherapists and leading researchers aim to provide practitioners with a method that centers liberation of all dimensions of being through intersectional client centered trauma informed and attachment focused practices alongside thoughtful attunement to the relational somatic imaginal cultural and transpersonal dimensions of healing integral psychedelic therapy will be essential reading for psychotherapists in practice and in training as well as those seeking personal healing and holistic transformation
