the central nervous system can be considered as an aggregate of neurons specialized in both the transmission and transformation of information information here has been used for many purposes but the most important oneis probably to generate a representation of the external world that allows the organism to react properly to changes in its external environment these functions range from such basic ones as detection of changes that may lead to tissue damage and eventual destruction of the organism and the implementation of avoidance reactions to more elaborate representations of the external world implying recognition of shapes sounds and textures as the basis of planned action or even reflection the question is how can we hope to understand the complexity inherent in this range of functionalities one of the distinguishing features of the last two decades has been the availability of computational power that has impacted the many areas of science concerned with this question an effort has been made within this book to cross boundaries and to have active scientists from different backgrounds and disciplines explain the basic principles which guide their investigations with the hope that this will lay the basis for a future collaborative effort to understand the principles of neural networks

allusions form a colourful extension to the english language drawing on our collective knowledge of literature mythology and the bible to give us a literary shorthand for describing people places and events so a miser is a scrooge a strong man is a samson or a hercules a beautifulwoman is a venus or a modern day helen of troy we can suffer like sisyphus fail like canute or linger like the smile of the cheshire cat this completely new reference work explains the meanings of the allusions in use in modern english from abaddon to zorro tartarus to tarzan and rubens to rambo the fascinating book is based on an extensive reading programme that has identified the most commonly used allusions and quotations are included at most entries to illustrate usage from a range of authors and

sources from thomas hardy to ben elton charles dickens to bridget jones s diary
