swiss architecture is commonly conotated with the names of celebrated architects such as marion botta peter zumthor or herzog de meuron and with their iconic buildings yet there is much more to the topic than for example beautiful private houses or spectacular public projects such as museums this new book looks at the swiss variety of co operative housing developments with a special focus on the city of zurich over the past two decades such developments have changed significantly support by public funding and open competitions have helped to design and realise a vast number of highly innovative co operative projects in zurich over that period many of them can serve as well as models for how to meet the constantly increasing demand for urban housing new housing in zurich is the first comprehensive survey of contemporary co operative estates in switzerland s largest city it features some 50 projects by type lavishly illustrated with images and plans thus also providing a typology of multi unit residential architecture essays on the history of co operative housing in switzerland the interplay between co operatives and the city and their impact on urban development on the larger scale on new urban and architectural concepts on co operatives in the post industrial age and on their social dynamics round out the volume

in this book leading architects and landscape architects provide their perspectives on the design of dense and green building types in high density urban contexts that can support higher population densities higher standards of environmental sustainability and enhanced liveability in future cities

experiences of the struggle for housing ignited by the lack of social and affordable housing have led to the establishing of shared and self managed housing areas in such a context it becomes crucially important

*to re think the need to define common urban worlds from below here penny travlou and stavros stavridis trace contemporary practices of urban commoning through which people re define housing economies connecting to a rich literature on the importance of commons and of practices of commoning for the creation of emancipated societies the authors discuss whether housing struggles and co habitation experiences may contribute in crucial ways to the development of a commoning culture the authors explore a variety of urban contexts through global case studies from across the global north and south in search of concrete examples that illustrate the potentialities of urban commoning*

*this book draws on a wide range of conceptual and empirical materials to identify and examine planning and policy approaches that move beyond the imperative of perpetual economic growth it sketches out a path towards planning theories and practices that can break the cyclical process of urban expansion crises and recovery that negatively affect ecosystems and human lives to reduce the dramatic social and environmental impact of urbanization this book offers both a critique of growth led urban development and a prefiguration of ecologically regenerative and socially just ways of organizing cities and regions it uncovers emerging possibilities for post growth planning in the fields of collective housing mobility urban commoning ecological land use urban rural symbiosis and alternative planning worldviews it provides a toolkit of concepts and real life examples for urban scholars urbanists activists architects and designers seeking to make cities prosper within planetary boundaries this book speaks to both experts and beginners in post growth thinking it concludes with a manifesto and glossary of key terms for urban scholars students and practitioners*

*few issues in the history of the language sciences have been an object of as much discussion and controversy as linguistic categories the eleven articles included in this volume tackle the issue of categories from a wide range of perspectives and with different foci in the context of the current debate on the nature and methodology of the research on comparative concepts particularly the relation between the categories needed to describe languages and those needed to compare languages while the first six papers deal with general theoretical questions the following five confront specific issues in the domain of language analysis arising from the application of categories the volume will appeal to a very broad readership advanced students and scholars in any field of linguistics but also specialists in the philosophy of language and scholars interested in the cognitive aspects of language from different subfields neurolinguistics cognitive sciences psycholinguistics anthropology*

*a must have for designers not to mention that quirky group in love with type for types sake you know who you are typography is the most visually dynamic compendium of typefaces on the market steven heller and louise fili two of the most admired and respected designers working today cover everything from the classic elegance of the late 19th century to the fractured hypermedia of today organized by historical era and country of origin each section introduces the culture and aesthetic of the period discusses how individual styles developed and offers insights into the artistry of key typographers and foundries expertly assembled and thoughtfully written no other book encompasses this wealth of type styles in historical context its pages are profusely illustrated with hundreds of complete alphabets and such original artifacts as typesheets catalogs broadsides posters and many other primary source examples in all typography is the long awaited type encyclopedia destined to be a standard reference work for years to come*

*explains the model of psychological types elaborated by c g jung back cover*

*emanuel christ and christoph gantenbein together with their teaching staff and students at eth zurich expanded their research on building typology to four more metropolises again in europe latin america and asia 180 buildings were analyzed over the past two years to find inspiration and models that can be adapted for the local context of any given city each example is documented with an image site and floor plans axonometric projection key data and a brief description an introduction and four essays on the interaction between various protagonists and in particular the effect of governing local building regulation again show the potential for contemporary urban architecture the result is again a rich sourcebook of great practical value for students lecturers and practitioners of architecture note de l [?] diteur*

*it is very difficult for the student or practitioner to find their way through the jungle of different personality typographies that has sprung up in the field of psychotherapy and even harder for them to find a*

point of sufficient height above the forest canopy to get their bearings in order to compare one system with another this volume offers such an observation point together with some possible mappings it surveys how different schools of therapy approach a basic topic the differences that exist between people including their attitudes feelings concerns and talents it examines different systematic and non systematic approaches to identifying different types of human being exploring whether there are systematic ways in which humans vary how we can assess the merit of different typologies and whether personality typing is a helpful approach to therapy character and personality types looks in detail at the arguments for and against the use of typologies of character and personality as a clinical tool and offers general criteria for judging the merits of particular personality systems as well as exploring the possibility of a wider synthesis

revised and expanded this new edition is a comprehensive guide that addresses the relationship of type development and personal transformation to the individuation process the underlying drive toward wholeness relates the emergence of typology as it occurred in c g jung s own thought analyzes the popular myers briggs type indicator and other type inventories as rewarding alternatives or complements to myth story and dream analysis and places typology in perspective to jung s larger model of human psychology making all of jung s work more accessible practical and less intimidating

the typological studies of this volume are oriented towards the areas of interests of the russian typologist vladimir p nedjalkov to whom the volume is dedicated they deal with the typology of verbal categories the book is divided into three parts 1 ergativity and transitivity 2 voice causative and valency 3 tense and mood in all three parts of the volume instances of grammaticalization are pointed out and investigated the studies concern various languages e g english french german russian hungarian dutch tariana a north arawak language from north west amazonia dumi a tibeto burman language and lak a daghestanian language
