of contemporary psycho analytic theory such as the place of affect and the instinctual drives the role of the ego and the basis of treatment the core of the evaluation centres on freud s basic method for gathering data free association a method which is not much written about and hardly ever criticised what is said about it is new and more substantial than the few criticisms that have been made although a very critical work there is probably no other appraisal which allows freud and his colleagues and followers to speak so directly for themselves
