this is the first comprehensive study of an east african lake for thirty years it represents
the culmination of research expeditions which stretch back twenty years and is thus able
to pick up long term changes which the individual research activities do not reveal lake
naivasha is a tropical lake whose natural fluctuations are now dwarfed by human impacts
papers show how the irrigation for horticulture and power cooling has reduced the lake
depth significantly exotic arrivals have altered the plant community beyond recognition
and its commercial value as a fishery and a tourist feature are reduced by over use
despite this the lake has considerable conservation value at present it provides a
different case study in the ever growing library of the effects of human follies lake
naivasha has achieved global importance in the past ten years because its waters are
used to sustain the largest horticultural industry in africa the book highlights its fragility
under such pressure and points out the way towards sustainable use of the water and
