new organic architecture is a manifesto for building in a way that is both aesthetically pleasing and kinder to the environment it illuminates key themes of organic architects their sources of inspiration the roots and concepts behind the style and the environmental challenges to be met the organic approach to architecture has an illustrious history from celtic design art nouveau arts and crafts to the work of antoni gaud and frank lloyd wright today there is a response to a new age of information and ecology architects are seeking to change the relationship between buildings and the natural

environment in the first part of his book david pearson provides a history and assessment of organic architecture the second part comprises statements from thirty architects from around the world whose work is based on natural or curvilinear forms rather than the straight line geometrics of modernism each statement is accompanied by full color illustrations of one or several of the architects built projects

a reissue in the frank lloyd wright 150th anniversary year of the series of lectures which the celebrated american architect gave in london in 1939 and which outline his core philosophy of organic architecture in may 1939 the celebrated american architect frank lloyd wright visited london and gave four lectures at the royal institute of british architects the meetings were hailed at the time as the most remarkable events of recent architectural affairs in england and the lectures were published as *an organic architecture* in september 1939 by lund humphries the texts remain an important expression of the architect s core philosophy and are being reissued now in a new edition to commemorate the 150th anniversary in 2017 of frank lloyd wright s birth in the lectures frank lloyd wright discusses several of his recent projects including his usonian houses his homes and studios at taliesin wisconsin and arizona fallingwater and the johnson administration building his charismatic flamboyant character and hugely creative intelligence leap to life from the pages as he looks to the future both in terms of the then imminent second world war and his vision for cities this new edition includes an insightful new essay by esteemed architectural historian professor andrew saint which sets the lectures within context and highlights their continued resonance and appeal

this is a unique and comprehensive collection of the significant speeches of frank lloyd wright the speeches presented spanning nearly six decades touch on wright s ideas on organic architecture the machine improving the human condition honor education democracy city planning and his broadacre city in particular and government profusely illustrated with over 300 photographs and drawings most of which have never been published a companion volume to the author s collection of conversations and interviews with wright the master architect

organic design in twentieth century nordic architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints the book focuses on the works and writings of architects in nordic countries such as sigurd lewerentz jørn utzon sverre fehn and alvar aalto among others it is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another erik champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer architectural brief and building as process with over 140 black and white images this book is an intriguing read for architecture students and professionals alike

an unsung prophet of today's green movement in architecture frank lloyd wright was an innovator of eco sensitive design generations ahead of his time an architect and designer of far reaching vision it is not surprising that frank lloyd wright anticipated many of the hallmarks of today's green movement across his work which stands upon a philosophy wright termed organic widespread evidence is seen of a refined sensitivity to environment to social organization as impacted by buildings and to sustainable and sensible use of space the desire to work and live with nature to create livable homes and cities is an ongoing theme of american architecture and planning this book explores wright's lessons on how climate sustainability sunlight modern technology local materials and passive environmental controls can become the inspiration for excellent design and highlights a selection of wright's buildings to show how he dealt with these issues the book is organized by the green concepts wright used including passive solar design and the use of thermal massing passive berm insulation environmentally sensitive landscaping passive ventilation systems passive natural light and intelligent and artful adaptation of technology with examples from different houses it shows how wright evolved certain ideas that continue to spur discussions of green architecture design today

peter blundell jones professor of architecture at the university of sheffield has long been concerned with the organic movement in architecture and has written extensively about it including a substantial work on hans scharoun the present book is not just a biography of haring but an unusually detailed analysis of his architectural work including many unbuilt projects which have

never before been published it also includes an account of haring s theory with translated extracts from his many writings through setting haring within his historical context and differentiating his position from figures such as mies le corbusier and hannes meyer peter blundell jones suggests a radical reframing of the early modern movement he was aided in the development of the book by haring s personal assistant in the late years margot aschenbrenner who was trained as a philosopher jaquette

this project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology the epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture the form of the organism was thought to calibrate modernism s infinite extension the architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks what is retained from the modernity of yesterday is the ideology of endless self generation revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence ai networks the essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science they range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks this book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally
