what is this book about beginning programming with html xhtml and css teaches you how to write pages using html xhtml and css it follows standards based principles but also teaches readers ways around problems they are likely to face using x html while xhtml is

the current standard the book still covers html because many people do not yet understand that xhtml is the official successor to html and many readers will still stick with html for backward compatibility and simpler informal pages that don t require xhtml compliance the book teaches basic principles of usability and accessibility along the way to get users into the mode of developing pages that will be available to as many viewers as possible from the start the book also covers the most commonly used programming scripting language javascript and provides readers with a roadmap of other technologies to learn after mastering this book to add more functionality to their sites

the doesn t stand still and neither does this guide completely updated to cover the new browsers standards and css dhtml and ajax features that define the today the one thing that hasn t changed in this edition is its task based visual approach to the topic in these pages readers will find friendly step by step instructions for using css dhtml and ajax to add visually sophisticated interactive elements to their sites using loads of tips and screen shots veteran author jason cranford teague covers a lot of ground from basic and advanced dynamic techniques for example making objects appear and disappear to creating effects for newer browsers migrating from tables to css and creating new dhtml scripts with embedded scroll areas fixed menu bars and more users new to css dhtml and ajax will find this a quick easy introduction to scripting while more experienced programmers will be pleased to find practical working examples throughout the book

are you looking to teach children how to code or are you looking to start coding this book on beginner html and javascript is the answer for the last couple of years the news keeps talking about the digital economy and how everyone needs programmers it seems like everyone wants to learn how to code however it is not that easy coding is a skill and like any skill it takes time to learn like any skill the younger you start the better you get from my personal experience with coding and also with teaching young kids how to code let me tell you that coding is a lot of fun and extremely gratifying it teaches you how to organize think logically communicate work in teams and be more creative however programming can be hard to learn especially if you start reading advanced books you need a step by step guide to get started this book starts off with the very basics how to install the software set up and write your first lines of code there are exercises at the end of each chapter that can test your new found knowledge and move you ahead and then we get you a few more advanced skills that can get you started making websites even if you ve never touched a computer in your life you will find this book useful scroll up and click add to cart now

in just a short time you can learn how to use html5 cascading style sheets css3 and javascript together to design create and maintain world class websites using a straightforward step by step approach each lesson in this book builds on the previous ones enabling you to learn the essentials from the ground up clear instructions and practical hands on examples show you how to use html to create the framework of your website design your site s layout and typography with css and then add interactivity with javascript and jquery step by step instructions carefully walk you through the most common web development tasks practical hands on examples show you how to apply what you learn quizzes and exercises help you test your knowledge and stretch your skills learn how to build your own web page and get it online in an instant format text for maximum clarity and readability create links to other pages and to other sites add graphics color and visual pizzazz to your web pages work with transparent images and background graphics design your site s layout and typography using css get user input with web based forms use javascript to build dynamic interactive web pages add ajax effects to your web pages leverage javascript libraries such as jquery make your site easy to maintain and update as it grows contents at a glance part i getting started on the 1 understanding how the works 2 structuring an html document 3 understanding cascading style sheets 4 understanding javascript 5 validating and debugging your code part ii building blocks of practical design 6 working with fonts text blocks lists and tables 7 using external and internal links 8 working with colors images and multimedia part iii advanced page design with css 9 working with margins padding alignment and floating 10 understanding the css box model and positioning 11 using css to do more with lists text and navigation 12 creating fixed or liquid layouts part iv getting started with dynamic sites 13 understanding dynamic websites and html5 applications 14 getting started with javascript programming 15 working with the document object model dom 16 using javascript variables strings and arrays 17 using javascript functions and objects 18 controlling flow with conditions and loops 19 responding to events 20 using windows part v advanced javascript programming 21 javascript best practices 22 using third party javascript libraries and frameworks 23 a closer look at jquery 24 first steps toward creating rich interactions with jquery ui 25 ajax remote scripting part vi advanced website functionality and management 26 working with based forms 27 organizing and managing a website
