recent lab and field experiments suggest that women are less effective than men in a competitive environment in this paper i examine how individual performance in a real work place is affected by a competitive environment and by its gender mix the competition is among math english and language teachers who participated in a rank order tournament that rewarded teachers with large cash bonuses based on the test performance of their classes the evidence suggest that the average ranking winning rate and awarded prize did not differ by gender nor between teachers in competition groups with only female teachers or with both genders i also find that the direct impact of the bonus program on students outcomes did not vary by male and female teachers or by the type of competitive environment in terms of gender mix of the participants as for mechanisms that can explain these results i found no differences by either gender or by the gender mix of the competition group in teachers awareness and familiarity with the program and its rules and in effort and teaching methods women though were more pessimistic about the effectiveness of teachers performance pay and more realistic than men about their likelihood of winning bonuses

this third edition of teaching mathematics for the 21st century continues to help teachers let the secret out to open up to their students the wonderful discoveries and challenges of the pattern making and problem solving aspects of a fascinating subject mathematics the rationale remains the same to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students changing demographics knowledge of how people learn and technology all impact the way we educate our young people this edition incorporates lessons and strategies from programs that have proven success in many types of classrooms many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts although technology is constantly being upgraded ways to increase student motivation through its application remains a goal for example since applets can enhance a lesson whether the teacher uses a computer projector a smart board or has students work individually on computers we have identified several sources of mathematics applets that can be correlated to various lessons research citations and summaries have been updated to reflect current information on teaching and learning for future teachers
