as space ventures have become more numerous leading scientists and theorists have offered ways of building a living habitat in a hostile environment taking an ecosystems view of space colonization the contributors to this volume take a radical multi disciplinary view of the challenge of human space colonization through the ongoing project persephone this book fundamentally challenges prevalent ideas about sustainability and proposes a new approach to resource austerity and conservation and providing truly sustainable approaches that are life promoting readers will learn the details of the plans for persephone a real project that is part of the company icarus interstellar's plans for the design and engineering of a living interior on a worldship to be constructed in earth's orbit within 100 years although the timeframe itself is only an estimate since it is contingent on many

significant developments including funding and technological advances the industry consensus is that within 100 years we will see manned space exploration beyond our solar system this notion is shared by organizations such as the initiative for interstellar studies and the darpa funded 100 year starship project this book specifically develops the principles for the construction of a living habitat within a worldship a multi generational starship that contains its own world that supports colonists as it travels across great distances between stars at a speed much slower than light far from being a sterile industrial setup such as the iss or even being a bucolic suburbia as proposed by gerard o neill in the 1970s this worldship will provide the pre conditions for sustaining life beyond earth s environment which may also lead to the evolution of non terrestrial ecologies drawing on the principles of ecopoiesis and insights offered by the biosphere 2 experiment that demonstrated what we have to learn about ecosystem construction this book proposes first designing the soils of such a space it should then be possible to set up the conditions that a first generation of colonists may experience in leaving our solar system to find new worlds to settle perhaps in spreading life throughout the universe although the book takes a unique view of ecology and sustainability within the setting of a traveling starship it is equally concerned with the human experience on artificial worlds chapters come from a range of multi disciplinary thinkers who shed light on the brave new future ahead from different angles

contract and regulation a handbook on new methods of law making in private law sheds light on the darker side of contracts it begins by exploring the regulatory space in which projects are planned deals are done and goods and services are consumed then shows how a bottom up approach can be adopted in order to view this transactional space through the eyes of contractors the expert contributors explore modes of governance that do not fit nicely into traditional contract theory paying special attention to three key examples governance and codes of conduction networks and relations compliance and use

danilov is a preeminent authority on museums according to danilov visits to science related museums constitute 38 to 45 percent of all visits to museums in the u s at the beginning of each section there is an introduction describing the history of that particular type of museum museum entries vary from about one half page to two pages in length a typical entry provides a history of the museum and description of the collection america s science museums is a well designed book that can be recommended to all public and academic libraries reference books bulletin science museums although they comprise less than 20 percent of the nearly 7 000 cultural institutions known as museums in the united states have become america s most popular type of museum from new bedford to waikiki america s science museums assesses the nations scientific and technological museums and related institutions examining their histories operations and offerings this reference volume looks at the many different types of such institutions including some that are not called museums but that are museum like in their operations such as aquariums botanical gardens arboretums planetariums and zoos in addition some related facilities such as marinelife and wildlife parks and research sites with visitor centers such as observatories and nasa space centers are included most of the museums described in the twelve sections of this unique comprehensive guide were selected because of their stature in the field while others were included because of their age specialty or novelty overall the

museums detailed here represent a cross section of the rapidly expanding science museum field and they illustrate why science museums have become so popular and instrumental in furthering science literacy across the u s the book s twelve sections focus on aquariums marine museums and marine life parks aviation and space museums botanical gardens conservatories and arboretums industrial history museums maritime and naval museums medical and health museums natural history museums planetariums and observatories science and technology centers transport automobile and railway museums zoos and wildlife parks and other science technology museums thorough descriptions of the 480 museums and related institutions provide comparative information on the nature development facilities collections and offerings of each an ideal reference for college courses dealing with the history philosophy collections exhibits operations and management of museums and for other researchers seeking background information and insight into the special merits of the leading institutions in the fields of science and technology
