an introduction to patent law and strategy this book was written by jeffrey schox for his course patent law and strategy for innovators and entrepreneurs at stanford university after an introduction to intellectual property it answers the questions how does the patent system work what is an invention is the invention patentable when should the patent application be filed does the invention infringe any patents and who owns the patent application the book was written before the passage of the america invents act aia which transforms the u s patent system from a first to invent system to a first inventor to file system this transformation which will affect less than 10 of the book does not take effect until march 2013 the author plans to revise this book in september 2012

with reference to china this book examines the course of international patent rights harmonisation its characteristics as well as impediments it evaluates the case of china s patent law development over the course of the last three decades by drawing on the most up to date chinese language sources in the process the volume focuses on china s patent legislation its achievements and weaknesses as well as the intrinsic limitations especially as far as enforcement is concerned the author pays close attention to the unique societal background in china a country that did not provide constitutional recognition to private property rights until 2004 and where a property law entered into force as late as 2013 30 years after the first promulgation of the patent law global trade policy makers ip professionals and businesses will benefit from the insights presented by the chapters as they will help them to appreciate the achievements and the controversies pursuant to china s efforts in patent protection while serving as a useful case study for countries seeking to leverage patent protection as a driver for economic development the book will equally facilitate chinese legislature to reflect on its patent legislation development specifically on legislative policy choices an additional analytical strength of the volume is that it compares the chinese patent legislation with the american invents act and the european patent convention it discovers the differences between the three patent legislations by using the minimum patent protection standards set down by the trips agreement as

the benchmark the results of the comparisons suggest that china has successfully harmonised its patent legislation with the global patent protection system and often opts for higher patent protection standards the book also considers whether china could learn lessons from japan and india in their respective patent legislation and policy choices with china undertaking a fourth patent law amendment the provisions contained in the second draft of the patent law 2015 which was published in december 2015 are included in the analysis

the book applies values and concepts from global administrative law gal to international patent law demonstrating how limiting technocratic and overly economic language can be highlighting the administrative foundations of patent law the book argues that in its international form it can be analysed using the same principles of participation transparency and accountability found in national administrative law at the heart of the book is a simple question what does international patent law look like when we approach it through the lens of these values what is being left out when patent law is described predominantly in terms of its technical legal provisions or economic impact the book presents three interrelated contexts eu patent law bilateral trade agreements and the multilateral space modern patent law is increasingly discussed in terms of national competitiveness or economic potential which reveals only a narrow understanding of how patent law evolves and functions the vocabulary of administrative law provides a fresh way of recasting reframing and re describing the dynamics of international patent law in a way that is more accessible to those outside of a traditional patent scholarship audience a fundamental objective of the book is to challenge the tendency towards technocratic isolation in patent law the book uses accessible vocabulary and represents a new way of conceptualising and understanding how patent law develops on a global scale the book will be of interest to researchers in the field of patent law international law and administrative law

written by an individual with experience as both a chemist and a patent attorney the chemist s companion guide to patent law covers everything the student or working chemist needs to know about patentability explaining important concepts of patent law such as novelty non obviousness and freedom to operate in easy to understand terms through abundant examples from case law as well as real world situations with which a researcher might be faced this book provides readers with a better understanding of how to put that knowledge into practice
