kierkegaard's relation to the field of philosophy is a particularly complex and
disputed one he rejected the model of philosophical inquiry that was
mainstream in his day and was careful to have his pseudonymous authors

repeatedly disassociate themselves from philosophy but although it seems clear that Kierkegaard never regarded himself as a philosopher there can be no doubt that his writings contain philosophical ideas and insights and have been profoundly influential in a number of different philosophical traditions. The present volume documents these different traditions of the philosophical reception of Kierkegaard's thought and the articles featured demonstrate the vast reach of Kierkegaard's writings in philosophical contexts that were often quite different from his own. Tome I is dedicated to exploring the reception of Kierkegaard in Germanophone and Scandinavian philosophy. Kierkegaard has been a major influence for such different philosophical projects as phenomenology, hermeneutics, dialogical thinking, critical theory, Marxism, logical positivism, and ordinary language philosophy. Similarly, in Denmark and Norway, Kierkegaard's writings have been more or less constantly discussed by important philosophers. Despite the later dominance of analytic philosophy in these countries, the present tome features articles on the leading Germanophone and Scandinavian philosophers influenced by Kierkegaard's thought.
