the past is what happened history is what we remember and write about that past the narratives we craft to make sense out of our memories and their sources but what does it mean to look at the past and to remember that nothing happened why might we feel as if nothing is the way it was this book transforms these utterly ordinary observations and redefines nothing as something we have known and can remember nothing has been a catch all term for everything that is supposedly uninteresting or is just not there it will take some possibly considerable mental adjustment before we can see nothing as susan a crane does here with a capital n but nothing has actually been happening all along as crane shows in her witty and provocative discussion nothing is nothing less than fascinating when nothing has changed but we think that it should have we might call that injustice when nothing has happened over a long slow period of time we might call that boring justice and boredom have histories so too does being relieved or disappointed when nothing happens for instance when a forecasted end of the world does not occur and millennial movements have to regroup by paying attention to how we understand nothing to be happening in the present what it means to know nothing or to do nothing we can begin to ask how those experiences will be remembered susan a crane moves effortlessly between different modes of seeing nothing drawing on visual analysis and cultural studies to suggest a new way of thinking about history by remembering how nothing happened or how nothing is the way it was or how nothing has changed we can recover histories that were there all along
