this book is a philosophical critique of the economics of climate change from both an ethical and philosophy of economics perspective mitigating climate change is not so much a scientific problem but rather a political social and above all an economic problem a future without greenhouse gas emissions requires a radical transformation towards a sustainable low carbon economy and society how this transformation could be achieved raises numerous economic questions many of these questions remain untouched although economists are equipped with a suitable toolkit and expertise this book argues that economists have a social responsibility to carry out more research on how global warming could be stopped and that ultimately economic analysis of climate change must be a political economic approach that treats the economy as part of a wider social system this approach will be of interest to policy makers educators students and researchers in support of more pluralism in economic research and teaching

why are people loyal how do groups form and how do they create incentives for their members to abide by group norms until now economics has only been able to partially answer these questions in this groundbreaking work paul frijters presents a new unified theory of human behaviour to do so he incorporates comprehensive yet tractable definitions of love and power and the dynamics of groups and networks into the traditional mainstream economic view the result is an enhanced view of human societies that nevertheless retains the pursuit of self interest at its core this book provides a digestible but comprehensive theory of our socioeconomic system which condenses its immense complexity into simplified representations the result both illuminates humanity's history and suggests ways forward for policies today in areas as diverse as poverty reduction and tax compliance

this book assesses the impacts of climate change on the economy agricultural sector and households in three of the mena countries syria tunisia and yemen the major channels of impact for global climate change are through changing world food and energy prices especially since all the countries

in the light of the covid 19 pandemic this book is not only timely but essential reading providing valuable insight into teaching economics both online and in a blended online in person format diverse in scope teaching economics online combines past experience with innovative ideas on how to design teaching and improve the overall learning experience whilst remaining inclusive effective and resilient

innovations in economic education addresses the growing issue of financial illiteracy by showing how economics can be successfully integrated into classrooms from kindergarten through higher education pre service teachers experienced educators curriculum leaders parents and school administrators will find practical ideas to improve economic understanding at the elementary level the book provides creative ways of introducing young students to the basic concepts of economics financial justice and social action for higher grade levels the book offers ideas to integrate economics into current history civics and math curricula the final portion of the book features recommendations by leading economic educators on how economics can play a greater role in teachers professional development the pedagogical tools presented in each chapter include lesson plans and practical insights and are designed to meet the ncss c3 framework and common core state standards for social studies this book is a timely and valuable resource for all educators interested in improving their students economic literacy and financial decision making
