as numerous countries in latin america and the caribbean and elsewhere are moving toward a second phase of private participation in infrastructure programs mostly through public private partnership schemes and other countries are just beginning the process several concerns remain from the outcomes of the first phase these concerns are making governments cautious in moving forward the impact of private sector participation in infrastructure addresses these concerns and brings clarity to the debate on the impact of private participation in infrastructure the assessment of this impact may be one of the most emotional policy issues in economics as it is clouded in a mist of myths perceptions and reality this book analyzes the impact and sorts out the truth from the myths the authors take a systematic and hard look at the facts i e data in latin america where starting in the late 1980s many governments brought private sector participation into the delivery of essential utilities services although there are many assessments of this experience none was able to rely on systemic cross country and time series data and practically all of them did not save rare exceptions account for what would have happened in the absence of interventions the counterfactual this book does just that it brings together an all encompassing database from the 1980s to the first decade of this century and develops an effective and robust methodology accounting for the counterfactual which tests and estimates the impact of reform on an exceptionally wide set of outcome indicators as a result this book presents the most in depth study to date of the private sector participation experience in latin america and it substantially advances the existing literature by offering robust econometric analysis

organizations such as the sierra club and friends of the earth are familiar to anyone with an interest in environmental protection as activist groups they played by the same rules for years but in 1994 the rules changed with the republican takeover of congress environmental groups faced sweeping changes in federal policies that threatened the enforcement of environmental laws as these organizations intensified their efforts to meet these challenges they also altered their electoral strategies and political spending patterns this book traces those actions and shows what they mean for the future of environmentalism in the political arena while environmental advocacy groups have become bigger and better funded in recent years so have the corporate interests that compete with them for the attention of public and politicians the green agenda in american politics offers a new look at environmental advocacy that focuses on contemporary lobbying electioneering and agenda setting in this new context drawing on interviews with activists from a wide range of organizations robert duffy describes what environmental groups actually do when lobbying officials or the public he examines activity at both national and state levels to emphasize their growing use of websites email and action alert networks to conduct more sophisticated grassroots campaigns and he shows how they are devoting more funds to unregulated forms of spending such as independent expenditure issue advocacy advertising and public education campaigns duffy also tracks emerging trends in interest group politics and provides an overview of activism through the early 1990s he then documents the emergence of more aggressive action after 1994 such as providing campaign services to candidates and mounting voter registration drives he also shows how state and local groups have begun to play more important roles in the wake of the rollback of federal environmental regulations brimming with new insights into interest group lobbies in general and contemporary environmental groups in particular duffy s book opens a new window on the influence of big money in the supposedly democratic electoral process

the current index to statistics cis is a bibliographic index of publications in statistics probability and related fields

substance abuse and its social consequences are a major public concern for communities throughout the world the motivations and consequences are deeply imbedded within the social and political structures of all countries whether they be well established democracies or developing nations every culture shapes the meaning of and responses to substances such as marijuana and heroin over time and across locations but the broader drug issue has become universal as the sphere of the problem expands the experiences and solutions of each nation become more relevant to other countries international concern over substance abuse has intensified as a result of the rise in production use and trafficking of illicit drugs all over the world therefore the practical knowledge of policy development and abuse prevention and treatment strategies in the middle east have increasing relevance for the rest of the world
