unique among contemporary resources the landmark systematic theology and its distinguished contributors present the major areas or loci of roman catholic theology in light of contemporary developments especially the seachange since vatican ii thought the best new historical studies of traditional doctrines and scripture and the diverse creative impulses that come from recent philosophy and hermeneutics culture and praxis and ecumenical contacts this new volume combines and updates both previous volumes incorporates into the framework nearly twenty years of fresh thought and bibliography in each area and adds revisions to key articles to take account of a diverse fluid and postmodern situation

mapping the motet in the post tridentine era provides new dimensions to the discussion of the immense corpus of polyphonic motets produced and performed in the decades following the end of the council of trent in 1563 beyond the genre s rich connections with contemporary spiritual life and religious experience the motet is understood here as having a multifaceted life in transmission performance and reception by analysing the repertoire itself but also by studying its material life in books and accounts in physical places and concrete sonic environments and by investigating the ways in which the motet was listened to and talked about by contemporaries the eleven chapters in this book redefine the cultural role of the genre the motet thanks to its own protean nature not bound to any given textual functional or compositional constraint was able to convey cultural meanings powerfully give voice to individual and collective identities cross linguistic and confessional divides and incarnate a model of learned and highly expressive musical composition case studies include considerations of composers palestrina victoria lasso cities seville and granada milan books calendrically ordered collections non liturgical music books and special portions of the repertoire motets pro defunctis instrumental intabulations

palestrina s music is justly regarded as exemplifying the most perfect and consistent technique of sixteenth century ecclesiastical polyphony it is for this reason that a study of his style has come to be considered as a necessary part of the training of serious musicians not only is the technique well nigh perfect in itself but it is also the vehicle of expression for some of the noblest music of the great age of vocal counterpoint this book investigates

the various technical processes as they appear in the music itself for that reason copious music examples have been given and the reader is asked to take very little theory on trust he is invited to examine for himself what palestrina did or did not do the book is on the one hand more specialized than morris contrapuntal technique its conclusions are therefore easier to grasp because less subject to exceptions and qualifications on the other hand it is wider in scope than jeppesen s palestrina and the dissonance in particular it includes a thorough and sensitive analysis of palestrina s methods of form and design a subject that has hitherto been much neglected dr andrews has given many years to the study and teaching of palestrina s style at oxford and to the actual performance of the music during the time when he was in charge of the music at new college his knowledge of the subject is not confined to academic dissection of technical matters he is fully aware of the aesthetic and expressive powers of the music which as he points out can only be fully realized in its performance in the service of the church dust jacket

first published in 1997 this book asks how an ecclesiastical climate was created in which anglican choral worship could flourish in the mid nineteenth century dale adelman draws on a wide range of sources including diaries correspondence pamphlets newspapers and critical writings to answer this question his research reveals the hitherto unrecognized extent of the influence of the cambridge camden society 1839 62 in the revival of anglican choral worship in particular through the auspices of its periodical the ecclesiologist but also through the dedicated efforts of the remarkable individuals who promoted the society s aims in their writings lectures and in their own parish churches the study examines the arguments that were framed in defence of choral worship and the often heated debates they initiated between both individuals and institutions in so doing it provides a re evaluation of the place of anglican choral worship in mid nineteenth century musicological and ecclesiastical history and demonstrates the role of cambridge ecclesiologists as primary force behind its rival

this new book explores the music of the great composer giovanni pierluigi da palestrina 1525 1594 its surrounding history and still unfolding potential it follows the music from love poetry through changing events in the church year to the composer s record breaking 104 mass settings uncovering many neglected treasures on the way its approach is accessible and largely non technical there is a focus on relationships with text belief and ceremony the individual melodic lines and the richly interweaving voice parts cantus alto tenor bass not least the author explores diverse ways
