data is the basic ingredient of all big data applications and big data technologies
are constantly deploying new strategies to maximise efficiency and reduce the time
taken to process information this book presents the proceedings of mmbd2022 the
third edition of the conference series modern management based on big data
mmbd the conference was originally scheduled to take place from 15 to 18 august
2022 in seoul south korea but was changed to a virtual event on the same dates
some 200 submissions were received for presentation at the conference 52 of which
were ultimately accepted after exhaustive review by members of the programme
committee and peer reviewers who took into account the breadth and depth of the
research topics and the scope of mmbd topics covered include data analytics
modelling technologies and visualization architectures for parallel processing
systems data mining tools and techniques machine learning algorithms and big data

for engineering applications there are also papers covering modern management including topics such as strategy decision making manufacturing and logistics based systems engineering economy information systems and law based information treatment and papers from a special session covering big data in manufacturing retail healthcare accounting banking education global trading and e commerce big data analysis and emerging applications were popular topics the book includes many innovative and original ideas as well as results of general significance all supported by clear and rigorous reasoning and compelling evidence and methods and will be of interest to all those working with big data

grappling with an issue at the core of the modern state and international security george gavrilis explores border control from the 19th century ottoman empire to 21st century central asia china and afghanistan exploring why some borders deter insurgents smugglers bandits and militants while most suffer from infiltration and crisis

community based collaborative action research a nursing approach provides a clear framework for an action research process to improve health outcomes and enact needed systems improvement the authors bring years of experience in community based collaborative action research cbcar to demonstrate how nursing and other health care practitioners leaders and scholars can transform communities by identifying and addressing systemic and structural barriers to health and well being these communities can range from neighborhoods practice environments and villages to boardrooms and organizations ideal for novice and experienced researchers including graduate and doctoral students involved in research initiatives and capstone projects this rigorous text is a non prescriptive step by step guide to enacting meaningful change that emerges primarily from within the community rooted in social justice and advocacy and driven by theory and evidence based practice community based collaborative action research a nursing approach is a unique and innovative resource

while the mediterranean is often considered a distinct unified space recent scholarship on the early modern history of the sea has suggested that this perspective is essentially a western one devised from the vantage point of imperial power that historically patrolled the region s seas and controlled its ports by contrast for the peoples of its southern shores the mediterranean was polymorphous shifting with the economic and seafaring exigencies of the moment nonetheless by the nineteenth century the idea of a monolithic mediterranean had either been absorbed by or imposed on the populations of the region in french mediterraneans editors patricia m e lorcin and todd shepard offer a collection of scholarship that reveals the important french element in the nineteenth and twentieth century creation of the singular mediterranean these essays provide a critical study of space and movement through new approaches to think about the maps migrations and margins of the sea in the french imperial and transnational context by reconceptualizing the mediterranean this volume illuminates the diversity of connections between places and polities that rarely fit models of nation state allegiances or preordained geographies

an unprecedented look at secret documents showing the deliberate nature of the armenian genocide introducing new evidence from more than 600 secret ottoman documents this book demonstrates in unprecedented detail that the armenian genocide and the expulsion of greeks from the late ottoman empire resulted from an official effort to rid the empire of its christian subjects presenting these previously

inaccessible documents along with expert context and analysis taner akçam s most authoritative work to date goes deep inside the bureaucratic machinery of ottoman turkey to show how a dying empire embraced genocide and ethnic cleansing although the deportation and killing of armenians was internationally condemned in 1915 as a crime against humanity and civilization the ottoman government initiated a policy of denial that is still maintained by the turkish republic the case for turkey s official history rests on documents from the ottoman imperial archives to which access has been heavily restricted until recently it is this very source that akçam now uses to overturn the official narrative the documents presented here attest to a late ottoman policy of turkification the goal of which was no less than the radical demographic transformation of anatolia to that end about one third of anatolia s 15 million people were displaced deported expelled or massacred destroying the ethno religious diversity of an ancient cultural crossroads of east and west and paving the way for the turkish republic by uncovering the central roles played by demographic engineering and assimilation in the armenian genocide this book will fundamentally change how this crime is understood and show that physical destruction is not the only aspect of the genocidal process
