this book is unique in the way that it looks at the much talked about maritime security through the perspective of national security without disconnect in the terrain specific mode of the ocean the uniqueness is not in the treatment of the concept of maritime security but that of national security in a manner that is different from the beaten notion of physical security of a nation and its people from external and internal threats national security according to the author is more than just military security or the conditions of what is often termed as internal security it is complex according to his studied findings the book provides a warning to governments that any approach to national governance without integrated maritime security can be defeating in the overall objective of maximising national security even for landlocked countries in the modern world the book provides a comprehensive review and analysis of integrated maritime security providing ample scope for further research on many of the concepts and terminologies inculcated as findings of research the interesting aspect is that the author views maritime security as a ghost protocol to hammer his ideas into the earnest listener

andré vltchek has compiled a stunning record in evoking the reality of the contemporary world not as perceived through the distorting prisms of power and privilege but as lived by the myriad victims he has also not failed to trace the painful and particularly for the west shameful realities to their historical roots in this work vltchek extends his penetrating gaze to a lovely desecrated almost forgotten vast area of the world oceania which he shows to be a microcosm of almost all major problems faced by our planet he brings to light the strength and courage of the people and their achievements and explores the hopes for decent recovery and survival if the powerful can allow themselves to comprehend what they have done and to accept the responsibility of actually protecting their victims instead of mouthing comforting and self serving slogans noam chomsky

aurora is a tremendous work aurora is what a literary work should be fully human it is also what used to be known as a major literary work because it's rare to its time it represents a leading edge of consciousness courage and social need a major work that's why it must be buried as we know i'm glad i can be part of it aurora is written at a consistently intense dynamic level i wish it could be 500 pages and dropped like a sonic boom on all the acclaimed literary centers of the world and be released like a

climatic change for the good in the rest of the world perhaps the most vital feature or effect of aurora is that it expands consciousness or perception it thinks the unthinkable the bankruptcy and worse of the louvre etc the culture it does what a lot of great works of art do it criticizes art itself explicitly and implicitly and in doing so helps to make the needed room for itself in the world of art and in the world in general it creates and helps generate new thought understanding perception going forward it helps not only express the full human condition it helps transform it it s a working work of art a badly needed new experience it enters the battle it will be ignored dismissed and fought by the old world while by the new world it will be part of another story entirely tony christini author of homefront
