in may 2010 labour suffered one of its worst ever election defeats a few months later it chose ed miliband as its new leader his task to win back power after just one term in opposition a tall order given how many voters had come to blame labour for the economic mess the country was in and to see the party as a soft touch when it came to

immigration and welfare even those who were more sympathetic had their doubts was ed miliband really leadership material would he be able to overcome defeating his elder brother to get to the top would he have to do as he was told by the trade union leaders who had helped him win could he resolve the tensions between blairites and brownites blue labour and new labour might his desire to keep his colleagues united mean labour stayed stuck in its comfort zone would he in seeking to break from the party s recent past take it too far to the left could he offer the electorate something really radical in 2015 or would he instead choose something safer but ultimately less inspiring and what should twenty first social democracy look like now that the money had run out this book by one of the country s foremost experts on party politics seeks to answer all those questions and in the run up to the 2015 general election to ask one more will ed miliband s five year mission turn out to be mission impossible

a superb crucial blistering expose of all the myths about our education system that are all too often used to attack it melissa benn again proves why she is one of country s most

formidable education campaigners and why the powerful should fear her Owen Jones, Guardian columnist and best selling author, never has it been more urgent to publicise the truth about what works and doesn't work in our education system, debunking the ideology of marketisation and exposing the half truths that pass for objective reporting. Benn and Downs meticulously lay out the evidence that a national system of comprehensive schools delivers the best outcomes. This hugely important book should be required reading for each new education secretary. Caroline Lucas MP's opinions about comprehensive education are often made into easy to swallow sound bites by media and politicians alike and whilst the benefits of a genuinely comprehensive education for all pupils are obvious, untruths have unwittingly evolved into hard facts based on them. Benn and Janet Downs work as part of the pioneering local schools network; the truth about our schools calls for us to urgently and articulately challenge unquestioned myths about state education. Benn and Downs have meticulously built an argument for its still enormously vital role and rigorously challenge assumptions that comprehensive education has failed, local authorities control and hold back schools, choice, competition and markets are the route to educational success, choice will improve education in England, the free school model, academies raise standards, teachers don't need qualifications, private schools have the magic DNA, progressive education lowers standards, anyone who thinks that comprehensive education cannot deliver that local authorities are the chief block to improving our school system, that competition and markets are the route to educational success and that private schools hold the magic DNA that can simply be transferred to other state schools will have their beliefs shaken by this blisteringly incisive book.

If you feel a bit cross at the presumption of some Oik daring to suggest everything you know about education might be wrong, please take it with a pinch of salt. What if everything you knew about education was wrong? Is just a title, of course you probably think a great many things that aren't wrong. The aim of the book is to help you murder your darlings. David Didau will question your most deeply held assumptions about teaching and learning, expose them to the fiery eye of reason and see if they can still walk in a straight line. After the experience, it seems reasonable to suggest that only if a theory or approach can withstand the fiercest scrutiny should it be encouraged in classrooms. David makes no apologies for this. Why wouldn't you be sceptical of what you're told and what you think you know? As educated professionals, we ought to strive to assemble a more accurate, informed or at least considered understanding of the world around us. Here, David

shares with you some tools to help you question your assumptions and assist you in picking through what you believe he will stew findings from the shiny white laboratories of cognitive psychology stir in a generous dash of classroom research and serve up a side order of experience and observation whether you spit it out or lap it up matters not if you come out the other end having vigorously and violently disagreed with him you ll at least have had to think hard about what you believe the book draws on research from the field of cognitive science to expertly analyse some of the unexamined meta beliefs in education in part 1 why we re wrong david dismantles what we think we know examining cognitive traps and biases assumptions gut feelings and the problem of evidence part 2 delves deeper through the threshold looking at progress liminality and threshold concepts the science of learning and the difference between novices and experts in part 3 asks us the question what could we do differently and offers some considered insights into spacing and interleaving the testing effect the generation effect reducing feedback and why difficult is desirable while part 4 challenges us to consider what else might w be getting wrong cogitating formative assessment lesson observation grit and growth differentiation praise motivation and creativity

the yearbook of international organizations provides the most extensive coverage of non profit international organizations currently available detailed profiles of international non governmental and intergovernmental organizations igo collected and documented by the union of international associations can be found here in addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the yearbook include networks between associations biographies of key people involved and extensive statistical data volume 4 covers international organizations by subjects or by fields of activity and specialization and includes an index to volumes 1 through 3
