the purpose of this qualitative study was to examine the perceptions that students and advisors administrators had regarding the mathematics placement process at a two year branch campus of a large urban mid western university participants in the study were 20 advisors administrators and 15 students qualitative data were collected from face to face semi structured interviews and focus groups placement test observations and placement test documents the student participants were students who had taken the compass esl computer adaptive math placement test and successfully completed a college level math course at the institution as well as students who had just recently taken the test the advisors administrators all had some level of involvement in the mathematics placement process at the institution therefore this research offered a unique opportunity to focus on the current mathematics placement process the results suggested that students want and need an opportunity to practice before they take the test this may encourage them to take the test more seriously furthermore the use of an entrepreneurial placement testing system should require that the recommendations made by them as to the procedures for administering the test be followed finally the institution is interested in implementing mandatory placement in mathematics this would include a well defined mathematics

placement appeal process for students who believe they are not correctly placed by the test as well as the use of multiple measures to determine the placement of students in a mathematics course

includes proceedings of the association's annual convention

publisher description

in the numbers explosion all around us in our modern day dealings the buzzword is data as in do you have any data to support your claim the data supported the original hypothesis that and the data bear this out but the field of statistics is not just about data statistics is the entire process involved in gathering evidence to answer questions about the world in cases where that evidence happens to be numerical data statistics for dummies is for everyone who wants to sort through and evaluate the incredible amount of statistical information that comes to them on a daily basis you know the stuff charts graphs tables as well as headlines that talk about the results of the latest poll survey experiment or other scientific study this book arms you with the ability to decipher and make important decisions about statistical results being ever aware of the ways in which people can mislead you with statistics get the inside scoop on number crunching nuances plus insight into how you can determine the odds calculate a standard score find the margin of error recognize the impact of polls establish criteria for a good survey make informed decisions about experiments this down to earth reference is chock full of real examples from real sources that are relevant to your everyday life from the latest medical breakthroughs crime studies and population trends to surveys on internet dating cell phone use and the worst cars of the millennium statistics for dummies departs from traditional statistics texts references supplement books and study guides in the following ways practical and intuitive explanations of statistical concepts ideas techniques formulas and calculations clear and concise step by step procedures that intuitively explain how to

work through statistics problems upfront and honest answers to your questions like what does this really mean and when and how i will ever use this chances are statistics for dummies will be your no 1 resource for discovering how numerical data figures into your corner of the universe

the collection of 72 articles offers the mathematics teacher suggestions for assessing testing and grading teaching efficacy how departments place students into courses the effectiveness of the major and the quantitative literacy of the graduating students lacks an index annotation c book new
