Longlisted for the 2024 Baillie Gifford Prize for Non Fiction a New York Times most anticipated book Fabulous One gets a thrilling sense of history unfolding in real time. Matthew Reisz The Guardian This dazzling innovative family memoir tells the story of a long lost plan to create a Jewish state in Texas on June 7 1907 a ship packed with Russian Jews sets sail not to Jerusalem or New York as many on board have dreamed but to Texas. The man who persuades the passengers to go is David Jochelmann Rachel Cockerell's great grandfather. The journey marks the beginning of the Galveston movement a forgotten moment in history when ten thousand Jews fled to Texas in the leadup to World War I. The charismatic leader of the movement is Jochelmann's closest friend Israel Zangwill whose novels have made him famous across Europe and America as Eastern Europe becomes infected by antisemitic violence. Zangwill embarks on a desperate search for a temporary homeland from Australia to Canada to Angola to Antarctica before reluctantly settling on Galveston. He fears the Jewish people will be absorbed into the great American melting pot but there is no other hope in a highly inventive style. Cockerell captures history as it unfolds weaving together letters diaries memoirs newspaper articles and interviews into a vivid account. Melting Point follows Zangwill and the Jochelmann family through two world wars to London New York and Jerusalem as their lives intertwine with some of the most memorable figures of the twentieth century and each chooses whether to cling to their history or melt into their new surroundings. It is a story that asks what it means to belong and what can be salvaged from the past.

This book is a must read for all those interested in the evolution of airplanes its protagonist Octave Chanute is best known for his scientific and collaborative approach to the engineering problems related to the development of flight and for the support he gave to the many aeronautical pioneers including the Wright brothers but as the author clearly demonstrates this engineer's contributions in the aeronautical field have frequently been underestimated even though almost every famous and not so famous aeronautical enthusiast contacted him and used the readily available drawings of his glider to build and

then learn to fly in their own design chanute s biplane glider design developed and flown first in 1896 in the indiana dunes along lake michigan proved to be a key step in the evolution of the flying machine by freely sharing not only drawings of the general design of this aircraft but also the lessons learned the biplane became the starting point or prototype for many experimenters and can be considered the foundation for the modern airplane this book focuses on chanute s work in aeronautics not having the internet of today he became the post box of early aeronautics not only because of his landmark book progress in flying machines but also because of his strong connections to anyone and everyone who worked in the aeronautical field he made a point of continuing to learn throughout his own life and strongly believed in sharing knowledge while fostering and mentoring all those who were willing to learn
