there are a lot of good books available to help people write better they include dictionaries usage guides and various types of writers manuals

and professional writers ought to have many of those books on their bookshelves but most architects and other design and construction professionals are not professional writers instead they are people who spend a large part of their professional lives writing that's a big difference and that's where this book will help the architect's guide to writing has been written not by an English major but by Bill Schmalz an architect who knows the kinds of documents his fellow professionals routinely have to write and understands the kinds of technical mistakes they often make in their writing this book is designed to meet the specific needs of design and construction professionals it's not going to waste their time with the things that most educated professionals know but it will help them with the things they don't know or are unsure of it's not a Chicago Manual sized encyclopaedic reference that includes everything any writer would ever need to know because architects don't need to know everything but what they do need to know and what they use every day in their professional lives has been assembled in this book

nature has perfected the art of deception thousands of creatures all over the world including butterflies moths fish birds insects and snakes have honed and practised camouflage over hundreds of millions of years imitating other animals or their surroundings nature's fakers use mimicry to protect themselves to attract and repel to bluff and warn to forage and to hide the advantages of mimicry are obvious but how does blind nature do it and how has humanity learnt to profit from nature's ploys dazzled and deceived tells the unique and fascinating story of mimicry and camouflage in science art warfare and the natural world discovered in the 1850s by the young English naturalists Henry Walter Bates and Alfred Russel Wallace in the Amazonian rainforest the phenomenon of mimicry was seized upon as the first independent validation of Darwin's theory of natural selection but mimicry and camouflage also created a huge impact outside the laboratory walls Peter Forbes cultural history

links mimicry and camouflage to art literature military tactics and medical cures across the twentieth century and charts its intricate involvement with the dispute between evolution and creationism

a complete scientific biography of darwin that takes into account the latest research findings both published and unpublished on the life of this remarkable man considered the first book to thoroughly emphasize darwin s research in various fields of endeavor what he did why he did it and its implications for his time and ours rather than following a strictly chronological approach a narrative choice that characteristically offers an ascent to on the origin of species 1859 with a rapid decline in interest following its publication and reception this book stresses the diversity and full extent of darwin s career by providing a series of chapters centering on various intellectual topics and scientific specializations that interested darwin throughout his life authored by academics with years of teaching and discussing darwin darwin s sciences is suited to any biologist who is interested in the deeper implications of darwin s research

includes publications of the ontario fisheries research laboratory

p 321 method of catching turtle by sucking fish p 227 aborigines employed in beche de mer fisheries p 328 method of capturing dugong description of spear used p 314 remains of fishweir at darnley island p 124 native names for torres strait islands
