in the field of knowledge discovery graphs of concepts are an expressive and versatile modeling technique providing ways to reason about information implicit in a set of data interesting examples of this can be found under the mathematical theory of formal concept analysis dedicated to the construction of a lattice of concepts by defining a galois connection on a binary relationship this book presents such graph of concepts under the more complex case of data that comes in a set of structured objects e.g. a set of sequences trees or graphs nodes of this graph will represent patterns in the data and edges will correspond to relationships of specificity from this combinatorial object results are derived such as a full characterization of logical implications and closed partial orders the results presented in this book are coupled with examples and empirical experiments that illustrate the derived theoretical contributions

kotaro suzumura is one of the world's foremost thinkers in social choice theory and welfare economics bringing together essays that have become classics in the field choice preferences and procedures examines foundational issues of normative economics and collective decision making social choice theory seeks to critically assess and rationally design economic mechanisms for improving human life an important part of suzumura's contribution over the past forty years has entailed fusion of abstract microeconomic ideas with an understanding of real world economies in a coherent analysis this volume of selected essays reveals the evolution of suzumura's thinking over his career groundbreaking papers explore the nature of individual and social choice and the idea of assigning value to freedom of choice different forms of rationality and concepts of individual rights equity and fairness suzumura elucidates his innovative approach for recognizing interpersonal comparisons in the vein of adam smith's notion of sympathy and expounds the effect of paying due attention to

nonconsequential features such as the opportunity to choose and the procedure for decision making along with the standard consequential features analyzing the role of economic competition suzumura points out how restricting competition may in some circumstances improve social welfare this is not to recommend government regulation rather than market competition but to emphasize the importance of procedural features in a competitive context he concludes with illuminating essays on the history of economic thought focusing on the ideas of vilfredo pareto arthur pigou john hicks and paul samuelson
