examining political novels that have achieved or been denied canonical status john whalen bridge demonstrates how herman melville jack london norman mailer ralph ellison toni morrison and margaret atwood have grappled with the problem of balancing radicalism and art he shows that some books are more political than others that some political novelists are more skillful than others and that readers must allow for basic working distinctions between politics and aesthetics if we are to make useful judgments about which political novels to read and why whalen bridge demonstrates with clarity and power that the american political novel should not be ostracized but celebrated as a genre equal or superior to poetic and aesthetic ones tobin siebers author of cold war criticism and the politics of skepticism

originally published in 1997 and now back in print making the american self by daniel walker howe the pulitzer prize winning author of what hath god wrought charts the genesis and fascinating trajectory of a central idea in american history one of the

most precious liberties americans have always cherished is the ability to make something of themselves to choose not only an occupation but an identity examining works by benjamin franklin jonathan edwards abraham lincoln frederick douglass henry david thoreau ralph waldo emerson margaret fuller and others howe investigates how americans in the 18th and 19th centuries engaged in the process of self construction self improvement and the pursuit of happiness he explores as well how americans understood individual identity in relation to the larger body politic and argues that the conscious construction of the autonomous self was in fact essential to american democracy that it both shaped and was in turn shaped by american democratic institutions the thinkers described in this book howe writes believed that to the extent individuals exercised self control they were making free institutions liberal republican and democratic possible and as the scope of american democracy widened so too did the practice of self construction moving beyond the preserve of elite white males to potentially all americans howe concludes that the time has come to ground our democracy once again in habits of personal responsibility civility and self discipline esteemed by some of america s most important thinkers erudite beautifully written and more pertinent than ever as we enter a new era of individual and governmental responsibility making the american self illuminates an impulse at the very heart of the american experience

this book explores the democratic and republican party platforms from 1840 to 2016 as the only official institutionally sanctioned document espousing the parties views on the state of the nation the platforms present to the party faithful a diagnosis of what ails the country and the promise of possessing the necessary cure in doing so they offer more than a listing of specific issues in need of redress through legislative action and moreover serve as a form of national storytelling through which political parties forge their vision of america and of what it means to be an american using topic modeling as an entry point into the documents the author moves to consider more closely two related themes those of how the platforms narrate the american self and individual freedom with consideration of the extent to which the parties envision the self as an isolated economic actor or as an individual with a range of duties and obligations to a broader community the spheres of action that they consider focal points for individual autonomy and the extent to which they view liberty as freedom from restraint or freedom to act this book sheds light on the historical trajectory of the growing fracture in american politics as well as the points of convergence across the two parties moreover positing that behind their divisive rhetoric both share a fundamental vision of what it means to be a person the author argues that perhaps their seemingly intractable differences are more a matter of degree than kind

why adopt a poststructural lens for the reading of the military strategy of national missile defence nmd no doubt when contemplating an attack on us territory by intercontinental ballistic missiles consulting michel foucault and critical international relations theory scholars may not seem the obvious route to take the answer to this lies in another question why has there been so much interest and continuous investment in nmd deployment when there is such ambiguity surrounding the status of threat to which it responds controversy over its technological feasibility and concern about its cost posed in this manner the question cannot be answered on its own terms the terms given in official accounts of nmd that justify the system s significance on the basis of strategic feasibility studies and conventional threat predictions guided by worst case scenarios instead this book argues that the preferences leading to nmd deployment must be understood as satisfying requirements beyond strategic approaches and issues in turning towards the

interpretative modes of inquiry provided by critical social theory and poststructuralism this book contests the conventional wisdom about nmd and suggests reading the strategy in terms of us identity presented as an analysis of discourses on threats to national security around which the need for nmd deployment is predominantly framed this book is an effort to let the two fields of critical international relations theory and us foreign policy speak directly to each other it seeks to do so by showing how the concept of identity can be harnessed to an analysis of a contemporary military strategic practice
