starting a chess game with 1 e4 e5 is so common that the resulting complex of opening systems traditionally commands its own sobriquet the open games 1 e4 met by other replies are semi open games and everything else comes under closed games the central structure with pawns on e4 and e5 often leads to play based around highly classical themes which are the bedrock of successful chess understanding first steps is a new opening series and is ideal for improving players who want simple and straightforward explanations first steps emphasizes the basic principles the basic strategies the key tricks and traps first steps books are based around carefully selected instructive games which demonstrate exactly what both sides are trying to achieve there is enough theory to enable the improving player to get to grips with the opening without feeling overwhelmed if you want to take up a new opening first steps is the ideal place to start

all the average club player needs is a small and manageable chess opening repertoire they don't have time and energy to study hundreds of pages of chess opening theory and why would they amateur games are rarely decided in the opening understanding structures and finding tactics are much more important renowned german chess trainers erik zude and jörg hickl have created an ideal club player's repertoire for

black this compact manual presents a set of lines that is conveniently limited in scope yet varied solid and complete the core repertoire is based on lines that the authors have successfully played at grand master level for decades the antoshin variation of the philidor defence against 1 e4 and the old indian defence against 1 d4 there is only a limited number of plans ideas and structures that you need to learn and very few forcing variations after an initial phase in which black may at first sight look slightly passive you will develop your position with a sequence of strong standard moves and start your highly effective counterplay zude and hickl provide common sense guidance explain all typical characteristics and give practical examples if you have an elo rating between 1400 and 2200 you don t need to look further because you can play 1 d6 against everything

the queenside fianchetto factor in the first full book to examine 2 b3 against the sicilian french and caro kann mainlines interesting sidelines and current theory are reviewed in addition what actually happens in modern practice is surveyed the authors are optimistic for white and concentrate on the best continuations while trying to be objective it is in that spirit that they conclude that 2 b3 is sound against the sicilian fun against the french and curious against the caro kann in all three cases the objective is to sabotage black s play to take him out of his comfort zone the word sabotage has historically derived from throwing a clog into machinery or in other words throwing a monkey wrench in the works here the wrench is a queenside fianchetto white aims his light square bishop toward the right flank he typically delays ng1 f3 so that he may play qd1 f3 or advance his f pawn and use his light square bishop to build a full scale kingside attack queenside castling often occurs hoping for a kingside pawn storm yet despite all these characteristics of 2 b3 white may still retains the option of d2 d4 for a more conventional looking 1 e4 opening with 2 b3 you will have one more arrow in your theoretical quiver to battle black and like it or not black will be compelled to do deal with the queenside fianchetto factor

a highly adventurous repertoire designed to meet 1 e4 with 1 e5 and take the initiative the main problem black faces in answering 1 e4 with 1 e5 is the plethora of opening systems available to white the ruy lopez giuoco piano scotch ponziani king s gambit vienna bishop s opening and so on each is likely to be white s pet line which usually means conducting the chess battle on the opponent s turf one solution is to study the main lines of all these openings and hope to remember what to do if they appear on the board another more enterprising approach is to turn the tables and make white fight on your territory adopting the latter course cc sim jonathan tait shares their investigations into a myriad of disregarded disreputable responses which can set white thinking as early as move three these lines are greatly under estimated by contemporary theory and include weird and wonderful variations such as the calabrese counter gambit 1 e4 e5 2 bc4 f5 the wagenbach defence to the king s gambit 1 e4 e5 2 f4 exf4 3 nf3 h5 the romanishin three knights 1 e4 e5 2 nf3 nc6 3 nc3 bc5 the two knights ulvestad variation 1 e4 e5 2 nf3 nc6 3 bc4 nf6 4 ng5 d5 5 exd5 b5 and ultra sharp lines of the jaenisch gambit 1 e4 e5 2 nf3 nc6 3 bb5 f5 the theory of the variations in this book is generally poorly understood this has made them successful at all forms of play including
