we live in the worlds that we help to create every day every activity either supports an existing system or effects some change however small but is it possible to consciously create the worlds in which we want to live this volume brings together systems theorists and practitioners who have worked on that question for decades it explores connections between design and systems ideas to explain why some efforts have been more successful than others and what is needed if we are to move forward it offers reflections on early and large scale attempts at impacting societal systems as well as proposals for taking those ideas into the future examples date back to the club of rome in the 1960s and look forward to the creation of ecologically sustainable systems in the future they address the need for collaboration and inclusion in settings from communities to corporations and while theories are presented as support for the examples they are explained in practical ways meant to be accessible both to students and to general readers
