scientific essay from the year 2015 in the subject business economics operations research grade 74 00 100 00 university of strathclyde strathclyde business school course foundations of operational research and business analysis language english abstract this essay is concerned with a fuzzy attractiveness of market entry fame model developed for the bulgarian winery vinprom vishtov vs vs had to decide whether to expand two of its wines a cabernet sauvignon and a chardonnay into either a regional or a national market shipley et al

2013 the model's purpose was to assist V&S management in deciding whether the firm should expand two wines into a regional or a national market. The success of the modelling exercise discussed in this essay can be assessed from two perspectives. The first perspective relates to the question whether the model generated satisfactory results given the problem V&S faced. The second perspective focuses on potential learning process on the part of V&S management stimulated through the modelling exercise.

Despite the popularity of lean and continuous improvement around the world, most organisations and their leaders struggle to make improvement work. Many are trying to cope with day-to-day business issues; they bury their heads in the work as they either give up on trying to improve or are floundering as they keep trying new initiatives to improve with little success. Most lean thinking and improvement publications focus on the use of improvement tools but never really get to the core of why organisations are not seeing the real results from these techniques. And lean thinking as an improvement strategy: they talk about what to do but not about the common problems you can expect along the way and how to navigate these. And create a fundamental change in how the business works. Making lean and continuous improvement work will help solve this problem and help leaders build a solid foundation to making lean and continuous improvement work in their business through numerous examples and detailed case studies. The book shows how business leaders, managers and frontline supervisors can make lean and continuous improvement techniques work, increasing consistency and getting more work done in less time.
