many books discuss the theology and doctrine of the medieval liturgy there is no dearth of information on the history of the liturgy the structure and development of individual services and there is much discussion of specific texts chants and services no book at least in english has struggled with the difficulties of finding texts chants or other material in the liturgical manuscripts themselves until the publication of medieval manuscripts for mass and office in 1982 encompassing a period of several centuries ca 1200 1500 this book provides solutions for such endeavours although by this period the basic order and content of liturgical books were more or less standardized there existed hundreds of different methods of dealing with the internal organisation and the actual writing of the texts and chants on the page generalization becomes problematic the use of any single source as a typical example for more than local detail is impossible taking for granted the user s ability to read medieval scripts and some codicological knowledge hughes begins with the elementary material without which the user could not proceed he describes the liturgical year season day service and the form of individual items such as responsory or

lesson and mentions the many variants in terminology that are to be found in the sources the presentation of individual text and chant is discussed with an emphasis on the organisation of the individual column line and letter hughes examines the hitherto unexplored means by which a hierarchy of initial and capital letters and their colours are used by the scribes and how this hierarchy can provide a means by which the modern researcher can navigate through the manuscripts also described in great detail are the structure and contents of breviaries missals and the corresponding books with music this new edition updates the bibliography and the new preface by hughes presents his recent thoughts about terminology and methods of liturgical abbreviation

originally published in 1965 the european dramatic tradition rests on a group of religious dramas that appeared between the tenth and twelfth centuries these dramas of interest in themselves are also important for the light they shed on three historical and critical problems the relation of drama to ritual the nature of dramatic form and the development of representational techniques hardison s approach is based on the history of the christian liturgy on critical theories concerning the kinship of ritual and drama and on close analysis of the chronology and content of the texts themselves beginning with liturgical commentaries of the ninth century hardison shows that writers of the period consciously interpreted the mass and cycle of the church year in dramatic terms by reconstructing the services themselves he shows that they had an emphatic dramatic structure that reached its climax with the celebration of the resurrection turning to the history of the latin resurrection play hardison suggests that the famous quem quaeritis the earliest of all medieval dramas is best understood in relation to the baptismal rites of the easter vigil service he sets forth a theory of the original form and function of the play based on the content of the earliest manuscripts as well as on vestigial ceremonial elements that survive in the later ones three texts from the eleventh and twelfth centuries are analyzed with emphasis on the change from ritual to representational modes hardison discusses why the form inherited from ritual remained unchanged while the technique became increasingly representational in studying the earliest vernacular dramas hardison examines the use of nonritual materials as sources of dramatic form the influence of representational concepts of space and time on staging and the development of nonceremonial techniques for composition of dialogue the sudden appearance of these elements in vernacular drama suggests the existence of a hitherto unsuspected vernacular tradition considerably older than the earliest surviving vernacular plays
