this book broaches the newly crafted concept of algorithmic dictatorship that draws on a plethora of human biases that creep into the algorithm and feeds into an automated decision that comes to the expense of citizens lives freedoms health property fair lending and credit scoring this book sheds a

keen light on the slew of reasons in view of which artificial intelligence should be both interpretable and controllable as opposed to merely explainable the reason for that is straightforward the skewed data baked into the bigoted algorithms machine biases spawns harrowing effects with which criminal justice has been grappling for a long haul drawn out tallyingly and perhaps unsurprisingly law enforcement evinces biases that run along both gender and race lines no surprise springs from the fact that computer generated algorithms that propel predictive policing are often flagged as tools whereby racial discrimination abounds it should not therefore be pegged as flabbergasting that this sort of shady algorithmic governance is a byproduct of a grueling algorithmic dictatorship that is shaping up to crumble the foundations of rule of law upon which stands modern societies this is one of the key takeaways of this book disturbingly enough brain computer interfaces are poised to be converted into shady tools to collate gauge thoughts emotions sentiments and crime related information that would be otherwise inaccessible to the governments rogue nations or unscrupulous actors prying eyes much to our dismay an eerily dystopian world is unfolding before our very eyes this is the gist of transhumanism a byproduct of convolutional neural networks that revolve around deep learning genetic algorithms that will overhaul the current legal landscape beyond recognition this book charts the path ahead as to draw set in stone boundaries to prevent jurisdictions from careening into the chaos of genetic plutocracy that should be wished away

this edited volume examines the concept of overhangs or legacies or negative stereotypical images in international relations and their impact on bilateral relations between geographically proximate states in east asia the case studies chosen japan korea japan china vietnam china thailand myanmar and thailand cambodia demonstrate conclusively that bilateral overhangs or legacies have a significant impact on contemporary international relations such images are regularly replicated and stoked by a variety of constituencies including state agencies for their own selfish interests the evidence also points to the fact that such bilateral relationships are relatively self contained and often operate with their own dynamics

powerful condensation symbols are appropriated to weave a story of the virtuous self and the stereotypical other this negative image and its replication is important to an understanding of turbulent bilateral relations in east asia and also helps to inform how such relations can be brought to an even keel
