Orwell was the ultimate outsider in politics, insecure, scornful of orthodoxies, cussedly independent. Best known today as the author of *Animal Farm* and *Nineteen Eighty-Four*, Orwell also wrote seven other full-length books and a vast number of essays, articles, and reviews. A pioneering cultural critic, he addressed a range of important issues, including art, literature, Englishness, mass communication, and the spectre of totalitarianism, famously describing his own background as lower-upper middle class. Orwell had a complex relationship with Marxism, and all his work reflects the influence of British Communism. In this thoughtful and original study, Philip Bounds argues that Orwell's writings effectively took the form of a dialogue with the leading British Marxists of his day. Bounds shows that Orwell often agreed with the Marxists and built on their insights in his writings, while on other occasions he used his disagreements with them as the basis of his own critical position. Through close analysis of Orwell's writings as well as his historical and literary context, Bounds has produced an important study of one of the iconic writers of the 20th century. *Orwell and Marxism* offers a thorough introduction to Orwell, the intellectual, reviving his reputation as a serious cultural thinker and documenting his most important influences, as well as a convincing portrait of British Marxism and society in the 1930s and 40s.

George Orwell (1903–1950) is one of the most influential authors in the English language. His landmark novels *Animal Farm* (1945) and *Nineteen Eighty-Four* (1949) have been translated into many foreign languages and inspired numerous stage and film adaptations. His well-known essays, *A Hanging* and *Shooting an Elephant*, are widely anthologized and often taught in college composition classes. The writer is credited with inventing the terms *Big Brother*, *thought crime*, *unperson*, and *double think*. His name itself has become an adjective: *Orwellian*. Seventy years after its publication, *Nineteen Eighty-Four* remains very popular, its sales surging in an era of enhanced surveillance and media manipulation. This literary companion provides an extensive chronology and more than 175 entries about both his literary works and personal life. Also included are discussion questions and research topics, notable quotations by Orwell, and an extensive bibliography of related sources.

As we begin a new century, the astonishing spread of nationally and internationally accessible computer-based communication networks has touched the imagination of people everywhere. Suddenly, the Internet is in everyday parlance, featured in talk shows, in special business technology sections of major newspapers, and on the covers of national magazines. If the Internet is a new world of social behavior, it is also a new world for those who study social behavior. This volume is a compendium of essays and research reports representing how researchers are thinking about the social processes of electronic communication and its effects in society. Taken together, the chapters comprise a first gathering of social psychological research on electronic communication and the Internet. The authors of these chapters work in different disciplines and have different goals, research methods, and styles. For some, the emergence and use of new technologies represent a new perspective on social and behavioral processes of longstanding interest in their disciplines. Others want to draw on social science theories to understand technology. A third group holds to a more activist program, seeking guidance through research to improve social interventions using technology in domains such as education, mental health, and work productivity. Each of these goals has influenced the research questions, methods, and inferences of the authors, and the look and feel of the chapters in this book. Intended primarily for researchers who seek exposure to diverse approaches to studying the human side of electronic communication and the Internet, this volume has three purposes: to illustrate how scientists are thinking about the social processes and effects of electronic communication; to encourage research-based contributions to current debates on electronic

communication design applications and policies and to suggest by example how studies of electronic communication can contribute to social science itself

this innovative monograph proposes the concept of the palimpsest as a paradigm for the relationship between theory and traditional literary criticism which could have a major impact on debate surrounding the role of theory in literary studies
