a fully comprehensive text for courses in electrical principles circuit theory and electrical technology providing 800 worked examples and over 1 350 further problems for students to work through at their own pace this book is ideal for students studying engineering for the first time as part of btec national and other pre degree vocational courses as well as higher nationals foundation degrees and first year undergraduate modules

this book explores many essential topics in a basic and easy to understand manner this book and the accompanying electronic devices and circuit fundamentals have been modified with significant updates in content the books are developed using a classic textbook electricity and electronics a survey 5th edition as a framework both new books have been structured using a similar sequence and organization as previous editions the previous edition of electricity and electronics a survey contained 18 chapters 8 in the electricity section and 10 in the electronics section this book has been expanded to include 19 chapters further simplifying content and providing a more comprehensive coverage of the content the content has been continually updated and revised through new editions and by reviewers over the years additional quality checks to ensure technical accuracy clarity and coverage of content have always been an area of focus each edition of the text has been improved through the following features improved and updated text content improved usage of illustrations and photos use of color to add emphasis and clarify content

this book provides energy efficiency quantitative analysis and optimal methods for discrete manufacturing systems from the perspective of global optimization in order to analyze and optimize energy efficiency for discrete manufacturing systems it uses real time access to energy consumption information and models of the energy consumption and constructs an energy efficiency quantitative index system based on the rough set and analytic hierarchy process it also proposes a principal component quantitative analysis and a combined energy efficiency quantitative analysis in turn the book addresses the design and development of quantitative analysis systems to save energy consumption on the basis of energy efficiency

analysis it presents several optimal control strategies including one for single machine equipment an integrated approach based on rwa mopso and one for production energy efficiency based on a teaching and learning optimal algorithm given its scope the book offers a valuable guide for students teachers engineers and researchers in the field of discrete manufacturing systems

textbook for a range of city guilds btec courses

flatland is a unique delightful satire that has charmed readers for over a century published in 1884 by the english clergyman and headmaster edwin a abbott it is the fanciful tale of a square a two dimensional being who is whisked away by a mysterious visitor to the land of three dimensions an experience that forever alters his worldview like the original ian stewart s commentary takes readers on a strange and wonderful journey with clarity and wit stewart illuminates abbott s numerous victorian references and touches on such diverse topics as ancient babylon karl marx mary shelley s frankenstein mt everest h g wells and phrenology the annotated flatland makes fascinating connections between flatland and abbott s era resulting in a classic to rival abbott s own and a book that will inspire and delight curious readers for generations to come

this edited volume advances existing research on the production and use of expert knowledge by international bureaucracies given the complexity technicality and apparent apolitical character of the issues dealt with in global governance arenas evidence based policy making has imposed itself as the best way to evaluate the risks and consequences of political action in global arenas in the absence of alternative democratic modes of legitimation international organizations have adopted this approach to policy making by treating international bureaucracies as strategic actors this volume address novel questions why and how do international bureaucrats deploy knowledge in policy making where does the knowledge they use come from and how can we retrace pathways between the origins of certain ideas and their adoption by international administrations what kind of evidence do international bureaucrats resort to and with what implications which types of knowledge are seen as authoritative and why this volume makes a crucial contribution to our understanding of the way global policy agendas are shaped and propagated it will be of great interest to scholars policy makers and practitioners in the fields of public policy international relations global governance and international organizations
