Iraq has dominated headlines in contemporary times but its controversial role in international affairs goes back much further. This book presents an understanding of one of the most persistent

crises in international affairs and the various roles the world's central peace making forum has played in it

if i had the power to do so i would make this book compulsory reading for all who exercise political power in our world today instead i will keep my fingers crossed that it will be read by as many members of congress and of the current us administration as possible and by a wide cross section of policy analysts diplomats academics and human rights defenders mary robinson former un high commissioner for human rights wars on terrorism and iraq provides a timely and critical analysis of the impact of the wars on terrorism and iraq on human rights particularly internationally as well as related tensions between unilateralism and multilateralism in us foreign policy the distinguished contributors examine the consequences for international relations and world order of the traditional standard bearer for human rights and democracy the united states appearing not to be championing the rule of law and negotiated conflict resolution the authors also suggest effective policies to promote greater fulfilment of human rights in order to achieve peaceful accord within nations and stability internationally

political instability has characterised the modern history of iraq which has proven itself as a complex state to govern however the creation of a federal system in 2005 offers the potential for change and a deviation from a past characterised by authoritarian government brutality and war the iraqi federation explores why and how iraq became a federal state and analyses how the process of formation impacts on the operation of the iraqi federal system it argues that the different approaches taken by various federal theorists in the past particularly william h riker's bargain theory are insufficient to explain the formation of the iraqi federation completely the process of the establishment of a federal iraq must be understood in the context of its unique history and cultural specificity as well as in the context of the other new federal models that have appeared since the end of the cold war including belgium the russian federation ethiopia bosnia and herzegovina and nigeria drawing on interviews with contemporary political players in iraq this book helps to deepen our understanding of how one of the newest federal states operates in a practical sense by linking the new federal models to the classic federal theory it also provides a unique contribution to theories on federal state formation it will therefore be of great interest to students and scholars of middle east politics as well as those studying

federalism

this examination of the 1991 uprisings in iraq demonstrates how external intervention by the un and other actors in ethnic conflicts has contributed to the problems with democratization experienced in the post saddam era

due to its primacy in explaining issues of war and peace in the international arena the discipline of international relations ir looms large in analyses of and responses to ethnic conflict in academia politics and popular media in particular with respect to contemporary conflicts in the middle east grounded in constitutive theory this book challenges how ethnic ethno nationalist conflict is represented in explanatory ir by deconstructing its most prominent state centric models frameworks and analytical concepts as much a critique of contemporary scholarship on kurdish ethno nationalism as a detailed analysis of the most prominent kurdish ethno nationalist actors the book provides the first in depth investigation into the relations between the pkk and the main iraqi kurdish political parties from the 1980s to the present it situates this inquiry within the wider context of the ambiguous political status of the kurdistan region of iraq its relations with turkey and the role kurdish parties and insurgencies play in the war against isis in iraq and syria appreciating these complex dynamics and how they are portrayed in western scholarship is essential for understanding current developments in the iraqi and syrian theatres of war and for making sense of discussions about a potential independent kurdish state to emerge in iraq iraqi kurdistan provides a comprehensive and critical discussion of the state centric and essentialising epistemologies ontologies and methodologies of the three main paradigms of explanatory ir as well as their analytical models and frameworks on ethnic identity and conflict in the middle east and beyond it will therefore be a valuable resource for anyone studying ethnicity and nationalism international relations or middle east politics

this book provides a descriptive and analytical narrative of the evolution of us foreign policy towards iraq at the supra national global national arab iraq and sub national iraqi kurdistan levels the book is unique in that it presents a sophisticated insight into the two major components of us iraq policy to achieve this it addresses us foreign policy towards both arab iraq and an entirely original analysis on us policy towards the iraqi kurds as components of a

larger US Iraq policy dictated by the supreme US grand strategy the book also examines whether US foreign policy towards Iraq has been one of continuity or change a dimension that has not been illustrated in any other publication the book deals intelligently and at great length with the events surrounding US Iraq policy in three distinct phases going back to 1979 with regard to Arab Iraq and 1961 in respect to the Kurdish liberation movement covering all subsequent US administrations including the Obama presidency it provides a thorough examination of US interests in Iraq and reasons for the 2003 invasion and its aftermath it also engages with the intellectual roots of US foreign policy presenting an intricate reaction of views objectives and agendas this work will be of interest to students and scholars of Middle East studies US foreign policy and security studies

This book critically analyses the topic of US led external interventions in the affairs of developing countries by using one of the most contested experiments of modern times namely the invasion of Iraq and its aftermath the March 2003 invasion of Iraq has so far failed to deliver the benefits and outcomes its supporters anticipated prompting international discussion as to whether the promises of externally led nation building as an attempt to mould rogue states in a democratic market friendly fashion are outweighed by the kinds of pitfalls and perils of intervention that have come to characterise the Iraq experience this book identifies and addresses the major issues emerging from the current debate including the evolution of external interventionism as an idea an explanation of what went wrong in post Saddam Iraq and why the Iraq experiment is flawed by the Bush administration's refusal to address long standing political and historical grievances among Muslims as part of the war on terror the contributors assess the troubled relationship between Islam and the West the prospects for democracy in the Middle East foreign policy debates in the US and how economics and politics are juxtaposed in a highly contentious manner in any project of externally driven nation building beyond the Iraq war brings together scholars and practitioners in an attempt to move beyond the polemical dimensions of the existing debate and provide a balanced analysis of what the Iraq enterprise can tell us about the brand of external interventionism espoused by the Bush administration and also the lessons it holds for any future interventions into the affairs of states it combines a mix of disciplines most notably international relations and economics as well as theory and empirical evidence the book is written in a non technical but rigorous manner in order to make complex and diverse

issues accessible to the general reader this fascinating and scholarly work will appeal to academics and scholars in the fields of political economics political science and international relations policymakers journalists and media commentators will also find this work to be of great interest and value

targeted this book primarily the study of the relationship between international relations and tourism and what the importance of the role of these relationships in the development of the tourism sector where tourism contributes to closer international relations cultural civilization and economic relations between the various countries of the world especially between neighboring countries which lead to support peace security and stability between nations tourism contribute also to show the reality of the country and society world wide in order to obtain gain positions and uphold the world towards political positions tourism has become the first cover of international relations

how is foreign policy made in iraq based on dozens of interviews with senior officials and politicians this book provides a clear analysis of the development of domestic iraqi politics since 2003 zana gulmohamad explains how the federal government of iraq and kurdistan regional government krg have functioned and worked together since toppling saddam to reveal in granular detail the complexity of their foreign policy making the book shows that the ruling elites and political factions in baghdad and in the capital of the kurdistan region erbil create foreign policies according to their agendas the formulation and implementation of the two governments foreign policies is to a great extent uncoordinated yet zana gulmohamad places this incoherent model of foreign policy making in the context of the country s fragmented political and social context and explains how iraq s neighbouring countries iran turkey saudi arabia and syria before the civil war have each influenced its internal affairs the book is the first study dedicated to the contemporary dynamics of the iraqi state outside the usual focus on the great powers and it explains exactly how iraqi foreign policy is managed alongside the country s economic and security interests

foreign and security policy have long been removed from the political pressures that influence other areas of policymaking this has led to a tendency to separate the analytical levels of the

individual and the collective using lacanian theory which views the subject as ontologically incomplete and desiring a perfect identity which is realised in fantasies or narrative scenarios this book shows that the making of foreign policy is a much more complex process emotions and affect play an important role even where hard security issues such as the use of military force are concerned eberle constructs a new theoretical framework for analysing foreign policy by capturing the interweaving of both discursive and affective aspects in policymaking he uses this framework to explain germany s often contradictory foreign policy towards the iraq crisis of 2002 2003 and the emotional even existential public debate that accompanied it this book adds to ongoing theoretical debates in international political sociology and critical security studies and will be required reading for all scholars working in these areas

this edited volume presents the foremost scholarly thinking on why the us invaded iraq in 2003 a pivotal event in both modern us foreign policy and international politics in the years since the us invasion of iraq it has become clear that the threat of weapons of mass destruction was not as urgent as the bush administration presented it and that saddam hussein was not involved with either al qaeda or 9 11 many consider the war a mistake and question why iraq was invaded a majority of americans now believe that the public were deliberately misled by the bush administration in order to bolster support for the war public doubt has been strengthened by the growing number of critical scholarly analyses and in depth journalistic investigations about the invasion that suggest the administration was not candid about its reasons for wanting to take action against iraq this volume begins with a survey of private scholarly views about the war s origins then assesses the current state of debate by organising the best recent thinking by foreign policy and international relations experts on why the us invaded iraq the book covers a broad range of approaches to explaining iraq the role of the uncertainty of intelligence cognitive biases ideas israel and oil highlighting areas of both agreement and disagreement this book will be of much interest to students of the iraq war us foreign and security policy strategic studies middle eastern politics and ir security studies in general

placing the second us iraq conflict in the context of emerging trends in international relations this exceptional timely volume examines the broad framework of us policy toward iraq under the administration of george w bush the second iraq war marks the third time since 1991 that the united states has invaded a muslim country and this book details not only the specifics of the conflict but the war s broad impact on us relations with muslim states both in a regional and global context it analyzes the development of the previous us policy of containment to the new doctrine of preemption the volume also examines the linkages between al qaeda s attacks on the united states on 11 september 2001 and the prosecution of the second iraq war

first published in 1979 prior to the iran iraq war this important collection of speeches explains some of the strategic foundations of iraq s foreign and internal policies under the ba th arab socialist party this work concerns itself with aspects varying from advice on youth let us win the young to safeguard the future to speeches on iraq s diplomatic relations this fundamental work concerning a historical and contemporary range of social and foreign affairs in iraq will be of considerable value to both political and diplomatic departments and universities and research organisations involved with the middle east it is also of major significance to anyone with an interest in the rise to power of one of the twentieth century s most infamous dictators

the almost universally accepted explanation for the iraq war is very clear and consistent the us decision to attack saddam hussein s regime on march 19 2003 was a product of the ideological agenda misguided priorities intentional deceptions and grand strategies of president george w bush and prominent neoconservatives and unilateralists on his national security team despite the widespread appeal of this version of history frank p harvey argues that it remains an unsubstantiated assertion and an underdeveloped argument without a logical foundation his book aims to provide a historically grounded account of the events and strategies which pushed the us uk coalition towards war the analysis is based on both factual and counterfactual evidence combines causal mechanisms derived from multiple levels of analysis and ultimately confirms the role of path dependence and momentum as a much stronger explanation for the sequence of decisions that led to war

this book examines us hegemony and international legitimacy in the post cold war era focusing on its leadership in the two wars on iraq the preference for unilateral action in foreign policy under the bush administration culminating in the use of force against iraq in 2003 has unquestionably created a crisis in the legitimacy of us global leadership of central concern is the ability of the united states to act without regard for the values and interests of its allies or for international law on the use of force raising the question does international legitimacy truly matter in an international system dominated by a lone superpower us hegemony and international legitimacy explores the relationship between international legitimacy and hegemonic power through an in depth examination of two case studies the gulf crisis of 1990 91 and the iraq crisis of 2002 03 and examines the extent to which normative beliefs about legitimate behaviour

influenced the decisions of states to follow or reject us leadership the findings of the book demonstrate that subordinate states play a crucial role in consenting to us leadership and endorsing it as legitimate and have a significant impact on the ability of a hegemonic state to maintain order with least cost understanding of the importance of legitimacy will be vital to any attempt to rehabilitate the global leadership credentials of the united states under the obama administration this book will be of much interest to students of us foreign policy ir theory and security studies lavina rajendram lee is a lecturer in the department of modern history politics and international relations at macquarie university australia and has a phd in international relations from the university of sydney
