do you start projects that are important to you but then abandon them it is likely unrecognized perfectionism that is holding you back from creating art starting your new business writing your book or growing spiritually you have big dreams that you keep secret because you don't want to be embarrassed if you fail at them great news this book is for you i will help shake you free of your procrastination paralysis calm your inner critic into silence and open you to become what your soul desires you will recognize and confront your fear of making mistakes and release the creativity killing but deeply held belief that you can't go for your goals because of the risk of not doing it just exactly right how well i've done it personality profile tests showed me very high on perfectionism and i didn't even realize it but then i got it i understood that this unhelpful internal drive to only do things i could do easily actually stunts my willingness to work on my biggest dreams outside of things like math tests perfect is mostly a myth yet it isn't even just that you expect to make no mistakes or only just a few on your way to doing difficult tasks learning the piano writing a business plan parenting or creating the next hit broadway play cindy wigglesworth author says well written and entertaining this book is full of helpful advice i recognized myself in some of the stories and i bet you will too don't waste time criticizing yourself use your time instead reading this book and trying the tips within it one such tip is looking at the critical voice as opposed to the creative voice and by critical in this sense i mean analytical a giant step we can take out of perfectionism is to distinguish between these two abilities and when to use them for example all of us are music critics we know what we like we know what sounds good we know what is boring we don't always agree exactly on those but we know the difference between a song by the beatles and something done in a garage by four guys who don't know what they're doing but what about you what about when you want to write a song you have a

lifetime of critical evaluation of music but writing it you are just starting out and surprise when you are just starting at something you suck at it perfectionists though expect to be very good at things very quickly and so you quit writing songs because your critical ability to know how good a song is is far more developed than your ability to actually write a good song see what i mean i have lived a creative life as a singer songwriter for over fifty years yet locked away inside my perfectionist heart is a restrained longing to paint and to write books i give thanks to john connor for his insightful and illuminating book the straitjacket of perfectionism he has provided me a key to free my creative soul i recommend this book to stymied perfectionists everywhere dana cooper singer songwriter even people who know how to write a good song and dana cooper was written many good songs have areas in which their perfectionism trips them up so get the straitjacket of perfectionism and come with me to get free of the trap of perfect and open up to progress taking steps and then really taking leaps toward your greatest goals
