causality is one of the core concepts in any attempt to make sense of the world and the explanations people come up with shape their judgments emotions intentions and actions this renders causal cognition a core topic for the social as well as the cognitive sciences in the past however research has been split into diverging paradigms each pertaining to a distinct sub discipline and focusing on a specific domain thus creating a rather fragmented picture of causal cognition furthermore most of this previous research paid only incidental attention to culture as a possibly constitutive factor leaving important questions unanswered is causality always perceived in the same way are causal explanations affected by the concepts to which people refer and or the language they use is causal cognition domain specific and if so how does it differ from agency construal is causal reasoning always based on the same cognitive mechanisms or does the cultural background of people shape how they process respective information and perhaps even their willingness to search for causal explanations in the first place by soliciting contributions that address questions like these this research topic aimed at assessing

the extent to which causal cognition may vary across species cultures or individuals at various stages of their development and at integrating different perspectives across a broad range of disciplines originating from the work of a research group funded by the center for interdisciplinary research zif at bielefeld university germany the scope of this research topic was broadened by inviting additional contributions from researchers with expertise in different fields of causal cognition agency construal and or cultural impacts on cognition in order to fully exploit the potential of cognitive science we explicitly encouraged submissions from scholars from all its classic sub disciplines i e anthropology artificial intelligence linguistics neuroscience philosophy psychology as well as scholars from comparative psychology cognitive archeology economics and any other discipline interested in causal cognition we welcomed empirical findings as well as theoretical contributions with an emphasis on those factors that do or may constrain trigger or shape the way in which humans and other primates think about causal relationships and inform us about both the diversity and the universality of causal cognition

a periodical in part famous for the cartoon portraits of politicians and public figures these were mainly by spy i e sir leslie ward and ape i e carlo pellegrini
