this textbook in palliative care nursing draws together the principles and evidence that underpins practice to support nurses working in specialist palliative care settings and those whose work involves end of life care

this landmark text is the key resource for nurses working in the field of palliative care edited by renowned nursing experts and written by a dynamic team of internationally known authorities in nursing and palliative medicine the oxford textbook of palliative nursing covers the gamut of principles of care from the time of initial diagnosis of a terminal disease to the end of a patient's life and beyond the text is distinctively developed to highlight the nurse's vital role as part of an integrated palliative care team various care settings are discussed including the hospital icu home care and hospice chapters focus on the practical aspects of nursing care including symptom assessment patient teaching family support psychosocial aspects of palliation and spiritual care new to the fourth edition are chapters on the national consensus project for quality palliative care guidelines palliative care of veterans palliative care in rural settings disaster situations palliative care in eastern europe and palliative care in the philippines

this title is directed primarily towards health care professionals outside of the united states content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally particularly the uk nice guidance on supportive and palliative care for people with cancer and the care of the dying pathway it reflects the rapid development of palliative nursing as an emerging specialty it helps in the process of defining palliative nursing and how it interfaces with other disciplines within the specialty the text is divided into three sections and comprehensively yet sensitively covers all aspects of palliative nursing key themes covered include pain control symptom control loss and grief and handling loss a strong emphasis is placed on the integration of theory and practice and evidence based care reconciliation of the theory and practice is achieved by the use of case studies it addresses malignant and non malignant palliative care research and extensive literature support each chapter content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally particularly the uk nice guidance on supportive and palliative care for people with cancer and the care of the dying pathway three new chapters on sexuality care of the dying pathway changing roles of the nurse in palliative care new appendix on north american drug names equivalents for the international market

what can nurses do to support those receiving palliative care how do you ensure clear communication and maintain patients and families preferences palliative care nursing is essential reading for nursing students professional nurses and other health and social care professionals providing supportive and palliative care to those with advanced illness or who are towards the end of life this third edition of the acclaimed textbook has been extensively revised and examines important research studies key debates around care and strategies to advance palliative care nursing in four sections the book covers key elements of nursing practice towards the end of life defining the palliative care patient providing palliative nursing care caring around the time of death challenging issues in palliative care nursing leading authors address contemporary issues and explore how to provide high quality person centred palliative care encouraging application to practice through exercises and case studies chapters completely reworked or new for this edition include those on communication living with uncertainty bereavement care the costs of caring nurses decision making and capacity and palliative care worldwide the clarity of evidence presented and coverage of a diverse range of topics make this the foundational textbook for all studying palliative care at pre registration level postgraduate level or as part of cpd study with a foreword by last edition editor professor sheila payne lancaster university uk i welcome this third edition of palliative care nursing and congratulations to the new team who have provided us with a dynamic and innovative development of a core text for palliative nursing practice as the largest workforce in palliative care and given the changing face of clinical practice for nurses including increased educational opportunity and expanding roles and responsibilities this book is timely in its focus on critical issues which frame and scope the reality of palliative care and the nursing contribution to that discipline the learning exercises in particular offer tools for educators and clinicians to reflect on practice and understand new ways of knowing in palliative care it will be an excellent resource for nursing both in the uk and ireland and to the wider international audience having drawn on the breadth of global nursing expertise to bring this book together philip larkin professor of clinical nursing palliative care university college dublin and our lady s hospice and care services dublin ireland president european association for palliative care this is a book of substance that captures the current status of palliative nursing including the values and research evidence that underpin

it the changing nature of palliative nursing as an evidence based specialism is balanced with practical skills and insights from experts and also considers the needs of those working with or concerned about the dying person s well being it covers a range of challenging issues as well as drawing on the wisdom of those who actually undertake this work on a daily basis i hope that students and practitioners from all disciplines will find this a useful resource to understand the art and craft of good palliative nursing professor daniel kelly fellow of the royal college of nursing and royal college of nursing chair of nursing research cardiff university uk

palliative nursing is an evidence based practical guide for nurses working in areas of practice where general palliative care is provided this may be in hospitals nursing homes dementia units the community and any other clinical areas which are not classified as specialist palliative care this book first explores the history and ethos of palliative care and then looks at palliative nursing across various care settings it then looks at palliative nursing care for people with specific illnesses including heart failure dementia chronic obstructive pulmonary disease cancer and neurological conditions palliative care for children and young people is discussed and then the book finally looks at education and research in palliative nursing palliative nursing will be essential reading for all nurses working with palliative care patients in a nonspecialist role i e in hospitals primary care and nursing homes as well as nursing students special features explores the palliative nursing issues related to specific diseases groups written in the context of the new national tools i e the end of life initiative preferred place of care liverpool care pathway and gold standards framework each chapter includes practice points and cases to allow the practitioner to undertake guided reflection to improve practice written by nurses for nurses provides guidance for nurses working in all four countries of the uk

introduction to communication approach c connect o options m making meaning f family o openings r relating t team

originally published in 2001 the textbook of palliative nursing has become the standard text for the field of hospice and palliative care nursing in this new edition the authors and editors have updated each chapter to ensure that the content is evidence based and current references are included they also have retained the important focus on case studies throughout the text and practical clinically relevant tables figures and other resources like the previous edition this text has an introductory section of the general principles of palliative care followed by a comprehensive section on symptom assessment and management encompassing twenty one different symptoms other key sections include psychosocial support and spiritual care providing holistic perspective on care of patients facing advanced disease the text also includes an innovative section on special populations addressing those most in need of palliative care the textbook is a useful resource for all nurses with the excellent section on end of life care across settings in this new edition the pediatric palliative care section has been greatly expanded and includes seven separate chapters on pediatric care it includes a section on special issues addressing topics such as ethical considerations nursing research and public policy perspectives and concludes with a section presenting models of excellence including six international models this edition also offers a narrative on dying based on a spouse s perspective the text includes an appendix with an extensive list of resources for nurses in the field

written by experienced authorities from around the world giving a wider international perspective on palliative nursing this substantially expanded

new edition has been specifically adapted to reflect working practices within the nhs all nurses especially those that are new to palliative care and those working in other areas of health where palliative skills are required will find this essential reading

this book unites complementary work in communication studies and nursing research to present a theoretically grounded curriculum for teaching palliative care communication to nurses the chapters outline the comfort curriculum central to this curriculum is the need for nurses to practice self care

annotation offering a blend of holistic and humanistic caring coupled with aggressive management of pain and symptoms associated with advanced disease this resource is organized around 15 competencies in palliative care developed by the american association of colleges of nursing with each chapter outlining specific skills needed to achieve each competency

this new and expanded edition is aimed directly at the learning needs of student nurses and is unique in that context whilst there are many high quality books available for academic study in palliative care this is currently the only one that balances a strong educational focus for developing nursing practice with an understanding of the particular needs of student nurses the text maintains a sensitive and supportive approach to the key themes of palliative care nursing but contains important new material of a wide range of initiatives that are impacting on end of life care across the uk it will provide the reader with a concise easy to read and learning oriented text that will give advice and direction to the many challenges faced in this most important area of patient care each chapter examines a key component of care and new features include learning outcomes at the start of each chapter to guide the reader clinical anecdotes to illustrate the reality and complexity of practice extensive use of recognisable symbols to guide the reader and improve the usability of the text competency assessment to help gauge knowledge and progress reflective points to aid professional development reflective activities to enable the student to reinforce learning from practice links to appropriate clauses of the current 2008 nmc code of professional conduct quality internet resources relevant to chapter content self assessment multiple choice tests at the end of each chapter to consolidate learning an extensive palliative care quiz covering the main topic areas of the book to test knowledge this can be used as evidence with professional portfolios

praise for the third edition in this comprehensive textbook on palliative care nursing editors marianne matzo and deborah witt sherman succeed in bringing together the heart of nursing and the true meaning of palliative care with the most current evidence based practice geripal this fourth edition of a comprehensive text reference that has been valued by students educators and practicing nurses for many years palliative care nursing continues to reflect the fundamental hospice and palliative care nursing competencies both basic and advanced that are essential for effective and empathetic care of patients and families this new edition reflects the tremendous growth of this vital discipline into the mainstream of health care and focuses on palliative care that is responsive to the demand for health care reform in america and globally it provides the knowledge scientific evidence and skills needed by nurses to address the complex physical emotional social sexual and spiritual needs of patients and families within the context of a changing health care delivery system with a focus on inter professional collaboration the book emphasizes the value of complementary

holistic models in promoting health and wholeness across the illness trajectory even as death approaches the book is edited by project on death in america faculty scholars who have worked to develop implement and evaluate nursing initiatives in palliative care in the u s and internationally with a focus on both quality of life and economic imperatives interdisciplinary authors describe the management of specific diseases and related physical and psychological symptoms and care of patients during the dying process they cover assessment of key symptoms and pharmacological non pharmacological and complementary interventions taking a life span approach the book includes age appropriate nursing considerations key points at the beginning of each chapter and callouts containing evidenced based information highlight best practices the text also examines relevant legal ethical and cultural considerations and offers case studies with conclusions in each clinical chapter new to the fourth edition thoroughly revised and expanded three new chapters addressing palliative care amidst health care reform rehabilitation in chronic or serious illness and post traumatic stress disorder a conceptual framework table in each chapter identifying the national quality forum domains of palliative care and basic and advanced palliative care and hospice nursing competencies updated evidence based callouts that review the highest quality studies

advanced practice palliative nursing is the first text devoted to advanced practice nursing care of the seriously ill and dying this comprehensive work addresses all aspects of palliative care including physical psychological social and spiritual needs chapters include symptoms common in serious illness pediatric palliative care spiritual and existential issues issues around the role and function of the advanced practice nurse apn reimbursement and nursing leadership on palliative care teams each chapter contains case examples and a strong evidence base to support the highest quality of care the text is written by leaders in the field and includes authors who have pioneered the role of the advanced practice nurse in palliative care this volume offers advanced practice content and practical resources for clinical practice across all settings of care and encompassing all ages from pediatrics to geriatrics

the oxford textbook of palliative nursing remains the most comprehensive treatise on the art and science of palliative care nursing available dr betty rolling ferrell and dr judith a paice have invited 162 nursing experts to contribute 76 chapters addressing the physical psychological social and spiritual needs pertinent to the successful palliative care team this fifth edition features several new chapters including chapters on advance care planning organ donation self care global palliative care and the ethos of palliative nursing

this textbook has introduced concepts and methods of education which help to move palliative nursing forward as an evidenced based practice of whole person care betty ferrell phd faan research scientist from the foreword in this comprehensive textbook on palliative care nursing editors marianne matzo and deborah witt sherman succeed in bringing together the heart of nursing and the true meaning of palliative care with the most current evidence based practice geripal palliative care is a philosophy of caregiving that integrates disease modification with supportive compassionate therapies for patients at the end of life palliative care nurses are responsible for alleviating pain and other physical symptoms along with satisfying the emotional social cultural and spiritual needs of patients who are facing life threatening illness this third edition of palliative care nursing provides more comprehensive newly updated content knowledge attitudes skills and cutting edge teaching and

learning strategies to achieve the AACN end of life nursing competencies providing a lifespan approach now in its third edition this book continues to emphasize the value of complementary holistic modalities in promoting health wholeness and wellness even as death approaches key topics discussed ethical aspects of palliative care legal aspects of end of life decision making loss suffering grief and bereavement on the part of patients and their families symptom specific nursing management of pain anxiety depression fatigue malnutrition and dehydration all common to palliative care how to communicate with the seriously ill and dying patients their families and their health care providers disease specific aspects of palliative care for those battling cancer heart disease lung disease hiv aids end stage renal and liver disease neurological and other disorders

this title is directed primarily towards health care professionals outside of the united states palliative care the nursing role is an introductory text for nurses and other health care professionals who deliver palliative care across a range of settings it lays a clear foundation of knowledge focusing on the needs and perspectives of patients and families who face the challenge of advanced incurable illness the style is highly accessible yet challenges readers to analyze key issues that present within palliative care covering the wide range of care provision in hospices hospitals and patients homes the book draws widely from practice based examples to explain and expand upon theoretical issues research evidence underpins each of the chapters guided activities encourage readers to reflect in a focused way on their clinical experience and current practice this new edition has been fully updated to reflect ongoing developments and shifting trends in palliative care education and practice it will suit the needs of both pre and post qualifying students seeking to develop their knowledge and is well suited to practitioners working within either generalist or specialist palliative care settings or within acute or community settings as well as those studying a range of palliative care educational curricula the authors have a wide range of experience in palliative care and all are actively engaged in practice and or education a clear broad based approach offers a thorough introduction for the non specialist nurse written and edited by an experienced team of nurses working in this field grounding it in current practice learning outcomes listed at the start of each chapter aid learning and comprehension reflective practice activities and an outline of cpd is especially useful for students working independently case histories recommended reading lists and references provide a solid evidence base for clinically based practice and facilitate further study thoroughly revised and updated to reflect changes in policy direction a new chapter on pain and symptom management revised content reflects the recent shift in the evidence base concerning spirituality includes psychosocial issues of loss for the patient their family and careers

nursing is an essential component of children's palliative care and palliative care is an essential aspect of nursing yet the complex inter disciplinary nature of palliative care brings into sharp focus the work nurses undertake with others in delivering palliative care this is however a book by nurses for nurses this comprehensive text presents the essential knowledge and skills required by nurses providing this invaluable care to a growing number of children the chapters are mapped to the children's palliative care education and training standards these are endorsed by the international children's palliative care network a major partner with the world health organization in the push to make children's palliative care a universal health right in its three parts children's palliative nursing care covers public and universal care core nursing and specialist care the chapters can be read individually or

cumulatively to move from engagement in public health and public understanding of palliative care through to delivering nursing care topics range from managing symptoms and end of life care to education research and issues of quality and leadership uniquely each chapter has been written by a team of authors who come from both high income and low middle income countries this makes this not just a book by nurses for nurses but a global book for global nursing practice

in this far ranging textbook on palliative and end of life care john costello and a team of palliative care specialists take a patient centred approach discussing palliative and end of life care across a range of diseases and illnesses each chapter includes real life case studies that focus on both the patient experience and the experiences of the family members of service users original in its approach to palliative and end of life care adult palliative care focuses on a range of non cancer conditions thoughtfully balancing theory with practice and interprofessional in its scope adult palliative care would benefit any health professional dealing with or working in the field of palliative and end of life care

this groundbreaking reference for palliative care nurses is the first to provide realistic and achievable evidence based methods for incorporating compassionate and humanistic care of the dying into current standards of practice it builds on the author s research based cares tool a reference that synthesizes five key elements demonstrated to enable a peaceful death as free from suffering as possible comfort airway management management of restlessness and delirium emotional and spiritual support and self care for nurses the book describes step by step how nurses can easily implement the basic tenets of the cares tool into their end of life practice it provides a clearly defined plan that can be individualized for each patient and tailored to specific family needs and facilitates caring for the dying in the most respectful and humane way possible
