i decided to write this book because i am aware that the curriculum of most universities hardly provides for meaningful teaching or learning of orthopaedics at the undergraduate level it is directed at medical students and junior surgical and orthopaedic residents who may not have had the opportunity to learn a lot of orthopaedics during their brief introduction to the specialty in the medical school and who may not wish to specialize in orthopaedics but are nevertheless required to take care of patients with orthopaedic problems on orthopaedic and non orthopaedic wards and clinics the book covers bone diseases and trauma in four parts part i deals with the basic sciences as applied to orthopaedics part ii discusses the pathology diagnosis and treatment of the major groups of bone diseases including arthritis metabolic bone diseases bone and joint infections congenital abnormalities bone tumours and back pain part iii discusses the general principles of diagnosis and treatment of fractures and gives a regional survey of individual fractures of the upper and lower limbs spine and pelvis part iv summarizes sickle cell disease as it affects the skeleton as well as a mixed bag of less well known orthopaedic diseases the contents are based on three previous volumes principles and management of acute orthopaedic trauma 1988 2004 and orthopaedic diseases summary of principles and management 2006 and a patient and carer s guide to bone diseases and fractures 2010 i believe that nurses physiotherapists and radiographers will also find the book useful

orthopaedic trauma represents 75 of the casualties in a disaster many of these patients will be cared for by international volunteers but good intentions are not always matched by good preparation this book explains how best to prepare for missions how to deal with injuries in austere conditions how to ensure a positive legacy and the need for cultural political and legal awareness all of the most common

orthopaedic presentations encountered in the austere environment are covered in addition to evidence based research cases and actual experiences from the authors missions are included to illustrate and bring to life key points this book written by a team of international experts with extensive experience of challenging field missions will be an ideal practical guide for volunteers and health care workers helping them to deal with confusing chaotic and distressing situations with greater confidence and efficacy

orthopaedics and orthopaedic trauma are highly complex subjects that can prove difficult to quantify but accurate measurement is required for setting standards of care and for assessing the severity of an injury this book will help the reader assess outcome instruments and provides many references to sources of instruments and techniques to use

a highly illustrated book providing concise yet comprehensive information on fracture classification and management the text has been developed according to the requirements of orthopaedic surgeons in training the first section covers general principles such as terminology and dealing with multiple trauma following sections take the reader systematically through regions of the body and the various possible fractures covering diagnosis treatment and healing in each case definitive information on the ever disputed issue of classification of

musculoskeletal injuries is provided throughout an effective reference book for the clinic this book is also an indispensable tool for trainees in orthopedic and emergency medicine and orthopedic nurses

the orthopedic ward can be a challenging location for the recently qualified doctor the demands and responsibilities in preparing patients for elective orthopedic and acute trauma surgery are often very different the situation is not helped by the impressive comorbidity often seen in orthopedic patients or the increasing tendency for out of hours ward cover to be provided by resident doctors working off their patch in this book the authors have attempted to provide a practical guide to the most common perioperative issues and medical problems found during the day to day management of these patients the model used is based on an earlier in house publication written for the guidance of anesthetic trainees working in a trauma intensive care unit the authors are all hardened observers of the speed at which today's recommendations become yesterday's history and so have made a particular effort to select references that will assist in readers remaining updated
