donald davidson has prepared a new edition of his classic 1980 collection of essays on actions and events including two additional essays in this seminal investigation of the nature of human action davidson argues for an ontology which includes events along with persons and other objects certain events are identified and explained as actions when they are viewed as caused and rationalized by reasons these same events when described in physical biological or physiological terms may be explained by appeal to natural laws the mental and the physical thus constitute irreducibly discrete ways of explaining and understanding events and their causal relations among the topics discussed are freedom to act weakness of the will the logical form of talk about actions intentions and causality the logic of practical reasoning hume s theory of the indirect passions and the nature and limits of decision theory the introduction cross references and appendices emphasize the relations between the essays and explain how

Davidson's views have developed

The two volumes of philosophical essays bring together the most important essays written by one of the world's foremost philosophers of language. Scott Soames has selected thirty-one essays spanning nearly three decades of thinking about linguistic meaning and the philosophical significance of language. A judicious collection of old and new, these volumes include sixteen essays published in the 1980s and 1990s, nine published since 2000, and six new essays. The essays in volume 1 investigate what linguistic meaning is, how the meaning of a sentence is related to the use we make of it, what we should expect from empirical theories of the meaning of the languages we speak, and how a sound theoretical grasp of the intricate relationship between meaning and use can improve the interpretation of legal texts. The essays in volume 2 illustrate the significance of linguistic concerns for a broad range of philosophical topics, including the relationship between language and thought, the objects of belief, assertion, and other propositional attitudes, the distinction between metaphysical and epistemic possibility, the nature of necessity, actuality, and possible worlds, the necessary a posteriori and the contingent a priori, truth, vagueness, and partial definition, and skepticism about meaning and mind. The two volumes of philosophical essays are essential for anyone working on the philosophy of language.

Truth, language, and history is the much anticipated final volume of Donald Davidson's philosophical writings. In the four groups of essays that comprise it, Davidson continues to explore the themes that occupied him for more than fifty years: the relations between language and the world, speaker intention and linguistic meaning, language and mind, mind and body, mind and world, mind and other minds. He asks what is the role of the concept of truth in these explorations, and can a scientific world view make room for human thought without reducing it to something material and mechanistic? Davidson's underlying picture, which can be seen in many of these essays, is that we are acquainted directly with the world, not indirectly via some intermediary such as sense data, representations, or language itself. That thought emerges in the first place through interpersonal communication in a shared material world and continues to develop as we engage each other in dialogue, and that language depends on communication, not vice versa. This is

the triangulating situation two creatures communicating about a common world about which davidson has written elsewhere as for the mind body relation our ontology need posit nothing more than material objects and events but as explainers we require two mutually irreducible vocabularies mind and body in the last six essays davidson finds interconnections between his own views and those of some of the major philosophers of the past including a new introduction by his widow marcia cavell this volume completes donald davidson's colossal intellectual legacy

in this volume first published in 2006 alasdair macintyre examines some fundamental philosophical questions in this first of two volumes of selected essays

this is the first of five volumes of a definitive history of analytic philosophy from the invention of modern logic in 1879 to the end of the twentieth century scott soames a leading philosopher of language and historian of analytic philosophy provides the fullest and most detailed account of the analytic tradition yet published one that is unmatched in its chronological range topics covered and depth of treatment focusing on the major milestones and distinguishing them from the dead ends soames gives a seminal account of where the analytic tradition has been and where it appears to be heading volume 1 examines the initial phase of the analytic tradition through the major contributions of three of its four founding giants gottlob frege bertrand russell and g e moore soames describes and analyzes their work in logic the philosophy of mathematics epistemology metaphysics ethics and the philosophy of language he explains how by about 1920 their efforts had made logic language and mathematics central to philosophy in an unprecedented way but although logic language and mathematics were now seen as powerful tools to attain traditional ends they did not yet define philosophy as volume 1 comes to a close that was all about to change with the advent of the fourth founding giant ludwig wittgenstein and the 1922 english publication of his tractatus which ushered in a linguistic turn in philosophy that was to last for decades

colin wilson's first book the outsider was published to great critical acclaim in may 1956 it was the first of six philosophical books known collectively as the outsider cycle

compiled by wilson during the following decade a summary volume introduction to the new existentialism appeared in 1966 during the 1970s however wilson s interests became on the surface more varied publishing books on criminology psychology and the occult but he always maintained a philosophical stance irrespective of subject matter and continued to write purely philosophical essays for journals magazines and symposia this volume brings together for the first time his essays on seventeen philosophers including some of those he met personally to discuss their ideas in his essay on spinoza he wrote philosophers are never so entertaining or so instructive as when they are beating one another over the head it is that statement applied to this particular volume that makes these essays from england s only home grown existential philosopher so eminently readable entertaining instructive and sometimes controversial

with the publication of the parerga and paralipomena in 1851 there finally came some measure of the fame that schopenhauer thought was his due described by schopenhauer himself as incomparably more popular than everything up till now the parerga is a miscellany of essays addressing themes that complement his work the world as will and representation along with more divergent speculative pieces it includes his aphorisms on the wisdom of life reflections on fate and clairvoyance trenchant views on the philosophers and universities of his day and an enlightening survey of the history of philosophy the present volume offers a new translation a substantial introduction explaining the context of the essays and extensive editorial notes on the different published versions of the work this readable and scholarly edition will be an essential reference for those studying schopenhauer the history of philosophy and nineteenth century german philosophy

this book addresses five main topics of metaphysics in its first section formal objects and truth makers tropes properties and predicates varieties of relations and the notion of explanation in metaphysics the second part of this volume focuses on the history of philosophy with an emphasis on austrian philosophy the ideas of bolzano wittgenstein locke and bergson amongst others are explored in the papers presented here this is the first volume in a two volume set that originates from papers presented to professor kevin mulligan covering the subjects that he contributed to during his career including ontology mind and value history and philosophy of mind and philosophy of language this volume contains thirty two chapters written by researchers from across europe north america and north africa these papers cover topics in metaphysics ranging from lehrer and tolliver s discussion of truth and tropes to johansson s defence of the distinction between thick and thin relations and persson and sahlén s presentation of the difficulties inherent in applying the concept of explanation in metaphysics papers on the history of philosophy include a look at bolzano s formative years and his conception of mathematics de libera examines brentano s adverbial theory of judgment and fisette traces the history of the philosophical society of the university of vienna in the late 19th and early 20th century marion contests the trendy pragmatist accounts that lump wittgenstein and heidegger together and there are analyses of locke and bergson s work amongst the many papers presented here this volume contains three chapters in french and one in spanish the second volume of this set looks at ethics values and emotions epistemology perception and consciousness as well as philosophy of mind and philosophy of language

in perception first form of mind tyler burge develops an understanding of the most primitive type of mental representational perception focusing on the functions and capacities of perceptual states burge accounts for their representational content and structure and develops a formal semantics for them the discussion explains the role of

iconic format in the structure it also situates the accounts of content structure and semantics within scientific explanations of perceptual state formation emphasizing formation of perceptual categorization in the book s second half burge discusses what a perceptual system is exploration of relations between perception and other primitive capacities conation attention memory anticipation affect learning and imagining helps distinguish perceiving with its associated capacities from thinking with its associated capacities drawing mainly on vision science not introspection perception first form of mind is a rigorous agenda setting work in philosophy of perception and philosophy of science

schopenhauer is renowned as the greatest most brilliant pessimist among philosophers he was the first to discover that our lives and world history are governed not by reason or rational planning but rather by the same blind hungry will as drives the lives of animals and plants instead of reason says schopenhauer there rules as the basic metaphysical principle just the the blind will appearing as the tendency to life the love of life vital energy the same thing as makes the plant grow because every being on earth is filled with this blind will and needs in order itself to live to find its place in the sun by pushing other beings aside persecuting and hunting them devouring them and itself fearing being devoured even the majestic lion stands on a mountain of corpses to which he owes his existence but worst of all are human beings who inflict pain both on animals and on each other they use their intelligence to systematically exploit build factories lock animals in cages and stalls and fight wars for land and materials like the buddhists schopenhauer concludes that life necessarily means suffering every life story is a story of suffering he writes and like the buddhists too he draws a radical conclusion we must say no to life and resists its pressure by means of art asceticism and meditation but what does it mean to say no to life if our lives are indeed just a devouring and being devoured under the impulse of blind will how can we ever escape this fate of what use is a pessimism like schopenhauer s today schopenhauer provides uncompromising answers to these questions that still fascinate us two hundred years on his key ideas are presented here with the aid of over a hundred quotations from his finest work the book appears as part of the popular series great thinkers in 60 minutes

covers topics in philosophy psychology and scientific methods vols 31 include a bibliography of philosophy 1933

these works won widespread attention on their publication in 1851 and helped secure lasting international fame for schopenhauer their intellectual vigour literary power and rich diversity are still striking today
