in a dualist democracy the rare triumphs of constitutional politics determine the course of normal politics more than a decade in the making and the first of three volumes this compelling book speaks to all who seek to renew and redefine our civic commitments in the decades ahead

we the people offers powerful portraits of communities across the united

states that have faced threats from environmentally destructive corporate projects and responded by successfully banning those projects at a local level we hear the inspiring voices of ordinary citizens and activists practicing a cutting edge form of organizing developed by the nonprofit law firm the community environmental legal defense fund celdf their methodology is an answer for the frustrations of untold numbers of activists who have been defeated time and again by corporate political power and legal entitlement instead of fighting against what we don t want this book can teach us to create from the ground up what we do want basing our vision in local control and law by refusing to cooperate with the unjust laws that favor corporate profit over local sustainability communities can show the way forward driving their rights into state constitutions and eventually into the federal constitution in communities from new hampshire to oregon new forms of local organizing have sprung up to fight fracking mining dumping of toxic waste and industrial agriculture among other environmental assaults these communities have recognized that the law has legalized the damaging actions of corporations while providing no recourse against harm and they have therefore decided to create a new system of law that makes local control and sustainability legal starting small this process has spread from rural pennsylvania to larger cities and towns and has resulted in the creation of state networks seeking to amend state constitutions this work is about finishing the american revolution by giving up the illusion of democracy and forging a system of true self governance in addition this is about recognizing in law for the first time in history that nature possesses legally enforceable rights of its own

political correctness appears innocuous enough until one truly looks at the ripple effect created by today s manipulative players looking for an advantage political correctness is a lie because saying it isn t so doesn t change the facts the facts are that pigs don t fly and life ain t fair this charade has become so ingrained in our culture today that no one is willing to call it what it is a façade for a culture of entitlement based on denial and rejection of responsibility while political correctness has been solidifying its place in our lives for some time now it has recently been joined by its natural adjunct partner socialism our current administration has decided it knows what s best for us in spite of a majority of voters expressing an opposing opinion but my real fear is that his agenda and ambitions are going to destroy america obama is not the first president with a large streak of narcissism but the others had equally expansive feelings about their country he epitomizes today s me culture with their it s not my fault mentality supported by their entitlement attitude he is the embodiment of everything that is wrong with america today he is the maestro of the blame game mistakes will be made

but others can be blamed we have misplaced our traditional values while buying into the liberal s progressive mindset our losses have been mounting for decades and the accumulative consequences are coming to bear the list is endless common sense common courtesies responsibility accountability integrity family values love of country and god i m not suggesting he caused this decline in america s moral values but i would suggest his radical vision for america and beyond is to take what we see today to the next level from his distorted perspective he is myopically focused on shepherding us to what s right for america

on the 250th anniversary of america s founding a landmark history of the us constitution for a troubling new era the us constitution is among the oldest constitutions in the world and one of the most difficult to amend although nearly twelve thousand amendments have been proposed since 1789 only twenty seven have ever been ratified tellingly the constitution has not been meaningfully amended since 1971 without amendment the risk of political violence rises so does the risk of constitutional change by presidential power leading harvard historian jill lepore captures the stories of generations of ordinary people who have attempted everything from abolishing the electoral college to guaranteeing environmental rights hoping to mend their nation recounting the history of america through centuries of efforts to realize the promise of the constitution we witness how nearly all those bids have failed we the people is the sweeping account of a struggle arguing that the constitution was never intended to be preserved but was expected to be gradually altered at a time when the risk of political violence is all too real it hints at the prospects for a better amended america
