as mainstream psychology was never intended for the hci practitioner this second edition of a psychology of user experience takes the opportunity to create a new chapter specifically written for

practitioners that is ux oriented psychology rather than the all too familiar everyday variety for example we discuss our two modes of cognition fast slow or controlled automatic we underline the importance of familiarity and how and why we check our phones every few seconds day or night we also establish the context for user experience noting that just about everyone uses a cell phone and very many own a smartphone too and have done so for years so how did they learn to use them user experience reflects the current vogue for designing for experience within hci which we recognise as something we feel rather than have reasoned about in the real world our feelings tell us how we are doing but with ux they tell us how we feel about using digital technology topics are introduced to ux which maybe unfamiliar such as virtual experiences and virtual emotions and the affect associated with the uncontrolled use of digital technology a psychology of user experience stands as a companion text to the author s hci redux text which discusses the contemporary treatment of cognition in human computer interaction

what does it mean to be a designer and what does it take to be a good designer understanding design stimulates designers to think about what they do how they do it and why they aim for a certain effect one hundred seventy five precisely formulated mini essays give insight into the design process and encourage reflection

a magazine for designers of interactive products

presents original research that spans the field of human computer interaction the primary emphasis has been on results of broad application but the journal also publishes work focused on special domains on special requirements on ethical issues the full range of design development and use of interactive systems
