the series is a platform for contributions of all kinds to this rapidly developing field general problems are studied from the perspective of individual languages language families language groups or language samples conclusions are the result of a deepened study of empirical data special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics

this is the first of a series of 6 books dealing with case phenomena in different languages both indo and non indo european resulting from work by a team of 20 specialists at the university of leuven it is the first time such a large scale investigation into case has been undertaken and a remarkable feature of the project is the use of computer corpora of authentic material this bibliography presents the many dimensions involved in research into case and case related phenomena this includes not only morphological case markers but also the crossconstituent semantic and grammatical relations expressed by morphological case or by its various counterparts morpho syntactic processes such as transitivity and passivization and pragmatic and textual considerations in addition the bibliography reflects the implications of case research for other disciplines such as foreign language teaching and artificial intelligence more than 6000 publications are listed an extensive subject index provides easy access to all the topics and major concepts covered a language index and a guide to languages language families conclude the book the other volumes in the series include the dative 2 vols the genitive the nominative and accusative and non nuclear cases

patrick farrell shows how grammatical relations are characterized in competing theories of grammar and reveals the different theories merits and limitations he compares mainstream generative transformational theory with formalist and functionalist approaches showing points of convergence and divergence this is an ideal introduction to the field for graduate students and will be a useful reference for theoretical syntacticians of all persuasions

this volume explores various problems in the syntax of austronesian languages which are found primarily in malaysia and the polynesian islands using the framework of constraint based theories of syntax contributors discuss the nature of these voice systems the function of their verbal morphology valence verbal diathesis and transitivity in such languages and the nature of their lexical categories each analysis is presented within the frameworks of lexical functional grammar and head driven phrase structure grammar

this book argues that the assumption that grammatical relations are both necessary and universal is an unwarranted generalization the grammatical relations of subject and object are required in the case of the indian language of kannada furthermore the notion of transitivity or transference which forms the basis for postulating grammatical relations does not

play the expected central role in all languages in the case of another indian language manipuri it is volitionality and transitivity which plays the central role in clause structure dr bhat argues against the universality and necessity of grammatical relations his provocative hypothesis will be a challenge to all those concerned with the nature of language

the eleven selected contributions making up this volume deal with grammatical relations their coding and behavioral properties and the change that these properties have undergone in different languages the focus of this collection is on the changing properties of subjects and objects although the scope of the volume goes beyond the central problems pertaining to case marking and word order the diachrony of syntactic and morphosyntactic phenomena are approached from different theoretical perspectives generative grammar valency grammar and functionalism the languages dealt with include old english mainland scandinavian icelandic german and other germanic languages latin french and other romance languages northeast caucasian eskimo and popolocan this book provides an opportunity to compare different theoretical approaches to similar phenomena in different languages and language families

this book is a collection of articles dealing with various aspects of grammatical relations and argument structure in the languages of europe and north and central asia lenca topics covered with respect to individual languages are split intransitivity basque causativization agul transitives and causatives korean and japanese aspectual domain and quantification finnish and udmurt head marking principles athabaskan languages and pragmatics eastern khanty and xibe typology of argument structure properties of give lenca typology of agreement systems asymmetry in argument structure typology of the amdo sprachbund spatial realtors northeastern turkic core argument patterns languages of northern california and typology of grammatical relations lenca are the topics of articles based on cross linguistic data the broad empirical sweep and the fine tuned theoretical analysis highlight the central role of argument structure and grammatical relations with respect to a plethora of linguistic phenomena

the papers in this volume have been grouped in three thematic parts valence which plays a key concept in the syntactic

classification of verbs and adjectives provides a necessary link for decoding and encoding grammatical relations and is an important requisite for the evaluation of formal languages for the purpose of describing and explaining phenomena of natural language the second group of papers concerns the notion of deep case and the implications of tracing a grammatical theory on semantic case the final series of papers is distinguished by the degree of accent it puts on the link between linguistic surface phenomena including semantic case and grammatical relations in the sense that it has been postulated by universal grammar

first published in 2003 routledge is an imprint of taylor francis an informa company

over the last twenty years or so most of the work on the syntax of philippine languages has been focused on the question of whether or not these languages can be said to have grammatical subjects and if so which argument of a basic transitive clause should be analysed as being the subject paul kroeger s contribution to this debate asserts that grammatical relations such as subject and object are syntactic notions and must be identified on the basis of syntactic properties rather than by semantic roles or discourse functions a large number of syntactic processes in tagalog uniquely select the argument which bears the nominative case on the other hand the data which have been used in the debate to assert the ambiguity of subjecthood are best analysed in terms of semantic rather than syntactic constraints together these facts support an analysis that takes the nominative argument as the subject kroeger examines the history of the subjecthood debate and uses data from tagalog to test the theories that have been put forth his conclusions entail consequences for certain linguistic concepts and theories and lead kroeger to assert that grammatical relations are not defined in terms of surface phrase structure configurations contrary to the assumptions of many approaches to syntax including the government binding theory paul kroeger is presently doing fieldwork in austronesian languages and teaching linguistics to fieldworkers from around the world

this is a collection of discussions of grammatical relations and related concepts using current syntactic theory

this volume presents thirteen original papers dealing with various aspects of two related areas of research of major concern to linguists of all theoretical persuasions voice and grammatical relations the papers are written from typological functional and cognitive perspectives and contain a number of general studies as well as studies focusing on specific issues and offer a wealth of data from a broad range of languages the volume provides up to date discussions of an array of issues of theoretical concern including the nature of grammatical relations voice in agent patient systems the expression vs non expression of participant roles and personal vs impersonal passives the papers in the volume demonstrate that investigations into the nature of voice and grammatical relations can still yield fresh theoretical and typological insights

originally published in 1977 on case grammar represents a synthesis of various lines of research with special regard to the treatment of grammatical relations arguments are assessed for and against case grammar localism lexical decomposition and relational grammar the book surveys the important evidence to support the validity of the choice of a case grammar as the most satisfactory of current accounts of the notion of grammatical relations this evidence is derived from a detailed examination of various processes in english and from a typological comparison of other languages notably dyirbal and basque the book also looks at the establishment of principled limitation on the set of case relations lexical syntactical semantic and morphological evidence suggests that the set of cases is in conformity with the predictions of a strong form of the localist hypothesis which requires that case relations be distinguished in terms of source vs goal vs location

the seven articles of this volume take up crucial aspects of information structure and grammatical form special attention is paid to the definition of topic focus and contrast to the language specific devices for expressing different types of these information structural notions and to the typological characterisation of languages as to discourse configurationality the investigation of grammatical relations includes the interplay between syntactic functions morphological case and thematic structure and the study of the functional and formal complexity of passive in germanic languages
