for many animals behavioural adjustments represent the first response to human modified conditions by improving reproduction and survival such adjustments can play the lead in maintaining viable populations in the face of rapid environmental change behavioural responses however can also be maladaptive and reduce individual fitness particularly if favourable reaction norms have not yet evolved because animals are encountering conditions that they have never experienced before clearly behaviour matters but how can we capitalise on our understanding of animal behaviour to improve conservation and management outcomes behavioural responses to a changing world challenges and

applications a companion volume to the first edition published in 2012 examines wildlife behavioural responses to human induced environmental change through a translational lens despite considerable and growing interest in research on the topic the predictive value and practical application of what has been learned remains underappreciated and underutilized in the context of developing real world solutions to redress this the current book builds upon the foundations of the original volume but with a more applied perspective that focuses on highlighting how different forms of environmental challenges from climate change to urbanisation influence animal behaviour and how we can effectively harness knowledge of animal behaviour to effect practical solutions to predicting and mitigating the weighty impacts of a radically changed and changing world

this textbook is designed to help students develop the nine core social work competencies outlined by the council on social work education cswe in its 2022 educational policy and accreditation standards epas visit the 2022 epas website to learn more about these standards and competencies social welfare policy in a changing world second edition offers an engaging student friendly approach that links policy and practice while employing a critical analytic lens to u s social welfare policy with particular attention to disparities based on class race ethnicity ability sexual orientation and gender shannon r lane elizabeth s palley and corey s shdaimah assess the impact of policies at the micro meso and macro levels the authors provide a brief foundation in history the policy process and theory while primarily helping students understand how policy shapes their lives communities and clients connecting description theoretical analysis and advocacy this text challenges readers to critically assess policy development its consequences and future implications students will come away with a newfound understanding of how to use the political process to address social justice issues and advocate for meaningful policy change

fire is a natural ecological process that shapes many ecosystems however the distortion of the natural fire regimes can provoke significant additional impacts land use changes in the last decades driven by human activity and changes in climate due to global warming have led to projections of increased fire recurrence and corresponding socioeconomic and environmental impacts during the last decades an impressive bulk of research has been produced addressing fire impacts on soils but the most recent shifts indicate more severe wildfires as well as novel occurrences in non fire prone areas which are less adapted and more vulnerable to this perturbation highlights the need of translating the current knowledge to other conditions fuegored is a research network created in 2007 aiming for a more direct knowledge transfer between scientists and society the x fuegored 2022 international congress was held in Évora portugal in october 2022 this special issue targeted this specific fuegored event but was open to additional research contributions on the effect of fires on the soil system and post fire management the spanish journal of soil science impact factor of 2 0 and citescore of 2 2 has now launched a new special issue to mark the xi fuegored 2024 international congress environmental impacts of fire on forest ecosystems across the globe

nigeria india relations in a changing world covers critical issues in the relations between

these two countries in a single volume even though the relationship between nigeria and india is characterized by a sense of continuity changes in the world since the end of the cold war have necessitated that the two countries recalibrate their foreign policies and adjust their domestic economies along with their approaches to governance sharkdam wapmuk provides an in depth examination of the contextual theoretical and historical foundations of nigeria india relations he analyzes nigerian and indian economic relations and contemporary dynamics in strategic engagement between the two countries the book concludes with an exploration of the new normal for nigeria india relations in the context of the covid 19 pandemic and beyond

how will global order unfold as we move into the next millennium with this basic question as a starting point leading scholars in politics economics and international relations from ten different countries have written 33 chapters specially commissioned for this new second edition which also includes introductory essays by the editors rapid change has become the norm in the international political economy the relatively strong and surprisingly sustained performance of the northamerican economies the growing economic integration of the european union and the economic crises in asia and russia all attest to the increasing pace and apparent unpredictability of changes to the global economy political economy and the changing global order provides an authoritative introduction to these changes and to the theory and changing practice of international economic relations as the world enters the new millennium the book ranges widely covering developments at global regional and national levels key issues and trends and the changing policies of major state actors as well as presenting a broad spectrum of theoretical perspectives particular emphasis is given to the role of the state in the international political economy the increasing importance of non state actors and the growing influence of both public and private forms of transnational governance

problems of scale have exercised the minds of ecologists for many years and will continue to do so into the future this volume deals with this subject and with mathematical approaches to improve our understanding of complex ecological systems the book also concentrates on monitoring the responses of ecosystems especially to human impacts upon them the importance of spatial separation of function at both the landscape and ecosystem level forms an important theme finally this special book focuses on large scale issues discussing in particular important applied ecological problems and how these can be managed through a variety of planning processes many examples of major ecological problems in the mainstream ecological literature are drawn from europe and north america in contrast many of the most pressing ecological problems are to be found elsewhere in the world this volume is composed of four parts according to scale objectives and application of modern ecological research part i covers emerging concepts and models in the ecosystem complex and in the landscape part ii biological responses to environmental changes pattern and process part iii ecological networking and restoration technology theory and practice and finally a summary of 8th intecol congress and possible future directions are covered in part iv
