to meet the challenges facing the army the army needs predictor measures that will enhance entry level soldier

selection and classification one of the purposes of the army research institute for behavioral and social sciences is to provide the army with recommendations on which predictor measures in particular measures of non cognitive attributes e g interests values and temperament demonstrate the greatest potential to inform entry level soldier selection and classification decisions the present report documents the development of criterion measures to assist in these analyses a second purpose of the army class project is to develop and pilot job knowledge tests jkts that can be used to aid reclassification decisions if soldiers are shown to possess critical knowledge skills and attributes ksas for their new jobs this could reduce training requirements and increase force readiness this report documents the development of reclassification jkt test items

this book offers practical ideas on the combination of sensory integration theory principles with other evidence based approaches in the evaluation and treatment of multifaceted issues in children with disabilities using the icf model a clinical reasoning model and featuring numerous case studies the opening chapters focus on the evidence for combining intervention approaches with diagnoses most often encountered in clinical practice the latter half of the book covers the delivery of services using blended intervention approaches in different settings such as the school the hospital and in nature featured are existing community programs illustrating the combination of approaches in practice appendices include reproducible resources a guide to assessments and approaches the text will guide occupational therapists and other health professionals working with children and adolescents across a variety of settings in using clinical reasoning skills in a systematic manner that will lead to better interventions

human resource practitioners are repeatedly faced with the challenge of effectively using language to clearly

describe the work performed on a job functional job analysis an internationally recognized and respected job analysis method has been meeting this challenge for more than forty years in this book the authors show how human resource practitioners can use structured task statements and comprehensive rating scales to gain the perspective needed to map the domain of any job in response to the demands of human resource practitioners the book focuses on the seven scales used in functional job analysis more than 450 structured tasks were used to illustrate the breadth and scope of all the levels of these scales these tasks can be used effectively as benchmarks to chart the work requirements of virtually any job personnel practitioners will find insights into the challenges of job analysis as well as the tools needed to make job analysis more comprehensive useful and effective for human resources representing the most comprehensive information to date on the use of functional job analysis scales for rating job tasks this book addresses the problems of using language to clearly describe how work is performed on the job describes the relation between the need to carefully control the language of job analysis and the structure inherent in the functional job analysis worker function scales a conceptual link showing the reader that the key to understanding work is in the vocabulary used to describe work contains the most comprehensive treatment of the way to write clear and comprehensive task statements available in the job analysis literature and contains a sample task bank for the job of functional job analysts aiding the reader in understanding how a complete functional job analysis should look

scales describing language proficiency in a series of levels can provide orientation for educational programmes criteria for assessment and reporting to stakeholders however in most cases such instruments are produced just by expert opinion a scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners it also implies a methodology for scaling content to different levels this book describes the use of

both qualitative and quantitative techniques to develop scales for the common reference levels in the common european framework of reference for modern languages short stand alone descriptors were i developed and classified ii refined and elaborated in workshops and then iii scaled by analyzing the judgments of one hundred teachers on the english language proficiency of the learners in their classes
