its outstanding feature is the inclusion of journal articles for more than 50 years the

periodicals have been indexed as well as compilations such as festschriften and the proceedings of congresses

john muir called it the range of light the most divinely beautiful of all the mountain chains i ve ever seen the sierra nevada a single unbroken mountain range stretching north to south over four hundred miles best understood as a single ecosystem but embracing a number of environmental communities has been the site of human activity for millennia from the efforts of ancient native americans to encourage game animals by burning brush to create meadows to the burgeoning resort and residential development of the present the sierra has endured and often suffered from the efforts of humans to exploit its bountiful resources for their own benefit historian david beesley examines the history of the sierra nevada from earliest times beginning with a comprehensive discussion of the geologic development of the range and its various ecological communities using a wide range of sources including the records of explorers and early settlers scientific and government documents and newspaper reports beesley offers a lively and informed account of the history environmental challenges and political controversies that lie behind the breathtaking scenery of the sierra among the highlights are discussions of the impact of the gold rush and later mining efforts as well as the supporting industries that mining spawned including logging grazing water resource development market hunting urbanization and transportation the politics and emotions surrounding the establishment of yosemite and other state and national parks the transformation of the hetch hetchy into a reservoir and the desertification of the once lush owens valley the roles of the forest service park service and other regulatory agencies the consequences of the fateful commitment to wildfire suppression in sierran forests and the ever growing impact of tourism and recreational use through beesley s wide ranging discussion john muir s divinely beautiful range is revealed in all its natural and economic complexity a place that at the beginning of the twenty first century is in grave danger of being loved to death available in hardcover and paperback

includes entries for maps and atlases

when the spanish colonized it in ad 1769 the california coast was inhabited by speakers of no fewer than 16 distinct languages and an untold number of small autonomous native communities these societies all survived by foraging and ethnohistoric records show a wide range of adaptations emphasizing a host of different marine and terrestrial foods many groups exhibited signs of cultural complexity including sedentism high population density permanent social inequality and sophisticated maritime technologies the ethnographic era was preceded by an archaeological past that extends back to the terminal pleistocene essays in this volume explore the last three and one half millennia of this long history focusing on the archaeological signatures of emergent cultural complexity organized geographically they provide an intricate mosaic of archaeological historic and ethnographic findings that illuminate cultural changes over time to explain

these late holocene cultural developments the authors address issues ranging from culture history paleoenvironments settlement subsistence exchange ritual power and division of labor and employ both ecological and post modern perspectives complex cultural expressions most highly developed in the santa barbara channel and the north coast are viewed alternatively as fairly recent and abrupt responses to environmental flux or the end product of gradual progressions that began earlier in the holocene

original edition published under the title production and operations management
