this book is comprehensive convenient detailed and is a guide for the mechanical engineer it aids the reader in understanding the basics of a wide variety of important engineering subjects with the help of the methodology laid forth in this book designers will be able to narrow down their options to those that are the most suitable for their projects it s one of a kind because of how the material inside it is organised the user gets quick access to information and they have a lot of leeway to explore the possibilities available to them even more customization is possible since the procedure is also implemented as software in addition to this the book is meant to serve as a long term reference source this methodology together with the accompanying charts and tables of performance indices may be used to real world challenges involving the choice of materials and processes and the library of useful solutions is especially valuable in modelling an important aspect of optimum design starting with the material indices produced in the case studies of the text the reader may go to the modelling of new design challenges leading to new material indices and value functions and new potentially innovative choices of material as his or her expertise increases it is assumed throughout the book that the reader has a foundation in fundamental engineering science material science manufacturing processes and engineering economics in order to construct any remotely realistic design thus this book is aimed towards upper level undergraduates graduate students and professional engineers who have never taken a course on the mechanical design process

the book integrates marketing concepts with the uniqueness of the pharmaceutical marketplace in a refreshingly simple direct and reader friendly style comprehensive in its coverage and versatile in its treatment the book assesses the pharmaceutical industry in the indian context in an international perspective the focus of the book is clearly and sharply on practice application and hands on experience providing experiential insights are the seventy one case studies discussed throughout the book showing how some companies have successfully applied the enduring innovative marketing concepts and reaped rich dividends and some others have paid dearly for not exploiting the dormant opportunities lying at their doorsteps

india s food is one of her most remarkable features its countless tastes and styles reflect the

nation's history enduring traditions and diversity of people and place but it is changing at a rapid rate beyond anyone's imagination eating the present tasting the future ventures off the plate to journey through India's contemporary foodscape to discover the myriad forces transforming what how and where Indians are producing trading and eating their food at a time when food and our relationship with it are topics of increasing global interest this is a timely and important work offering unique insight into a complex society

this book presents hard facts drawn from extensive research to highlight our unsustainable consumption of the earth's resources and the limitations of the UK's current management of waste and recycling setting out a bleak picture of a world in which we are literally consuming our planet the book explores the psychological economic and capitalist drivers behind this behaviour controversially the book examines the drawbacks of the current approach adopted by many local authorities on the kerbside collection of recyclable materials as well as the UK government's strategic approaches to household recycling including the lack of UK wide infrastructures for packaging reuse and for product repair and recycling it challenges the whole concept of waste leading to a proposed new strategy for the management of household waste including a simplified household collection system the introduction of an incineration tax and the banning of all household waste exports the author proposes reconceptualising waste as unwanted but valuable material and argues that the responsibility for facilitating reuse repair and recycling rests with manufacturers who must start designing with the end in mind given the current economic climate and a dampening of the green agenda within UK politics the book provides a much needed call for critical discourse on how and how much we consume and sets out clear practical solutions for change the book will be of interest to manufacturers retailers consumers local authorities policy makers students and professionals looking to reduce our impact on the environment the open access version of this book available at taylorfrancis.com has been made available under a creative commons attribution non commercial no derivatives cc by nc nd 4.0 license
