the purpose of this synthesis is to bring together materials and information on the design and maintenance of low volume roads a literature search has been obtained from hris ntis and the engineering index over 1 000 questionnaires were then sent to cities counties and consultants in the northern tier of states and the canadian provinces interviews were also held with representatives of minneapolis st paul duluth hennepin and st louis counties regarding their low volume road design and rehabilitation procedures

this book provides the theory and design methodology necessary for students and practitioners with limited computer experience to

formulate a software design and to communicate that design to a programmer the book addresses the most critical need in data processing today the generation of adequate system documentation for systems development and maintenance and bridges a gap between the applications user and the software specialist finally it broadens the student s perspective of software development from a limited programming approach to an appreciation of total system design

this book is designed to take advantage of the almost universal availability of personal computers utilizing computer aided design methods this book allows readers to optimize a design with a few key strokes to ask what if to examine alternatives and to plot and interpret the effect of design changes emphasis is placed on evaluation and interpretation of results and development of design skills
