the ape that understood the universe is the story of the strangest animal in the world the human animal it opens with a question how would an alien scientist view our species what would it make of our sex differences our sexual behavior our child rearing patterns our moral codes our religions our languages and science the book tackles these issues by drawing on ideas from two major schools of thought evolutionary psychology and cultural evolutionary theory the guiding assumption is that humans are animals and that like all animals we evolved to pass on our genes at some point however we also evolved the capacity for culture and from that moment culture began evolving in its own right this transformed us from a mere ape into an ape capable of reshaping the planet travelling to other worlds and understanding the vast universe of which we're but a tiny fleeting fragment

the field of forensic psychology explores the intersection of psychology and the law the purpose of this book is to examine topics in the field using the powerful multidisciplinary conceptually integrated approach that the natural sciences have embraced for decades with great success darwin's theory of evolution by natural selection is the meta theoretical framework that unifies the field of biology it unites research and understanding of the development control and organization of behavior the study of humans which includes all of the social sciences is part of the field of biology darwin's theory provides a powerful meta theoretical framework that can unify and energize forensic psychology just as it has the biological sciences evolutionary processes undoubtedly shaped physiological characteristics to help solve problems of survival and reproduction the lungs for example with their vast surface area and moist membranes are marvelous adaptions for extracting oxygen and releasing carbon dioxide natural selection is the only known process capable of shaping complex functional mechanisms just as it shaped physiological adaptations with specific problem solving functions it also shaped our thoughts and emotions to guide behaviors toward solving recurrent problems of survival and reproduction with this logic we can use knowledge of ancestral problems to guide our understanding of how the mind works evolutionary forensic psychology is a necessary step toward a unified and complete understanding of psychology and the law it recognizes that crimes such as murder non-lethal violence rape and theft are manifestations of evolutionarily recurrent selection when they gave individuals an advantage in competition for resources each of the chapters that comprise this volume has been

selected to provide the first unified examination of important research contributions and future directions of evolutionary forensic psychology

the authors in the volume extend the reach of their comprehensive reviews into theoretically driven and innovating explorations the scope of coverage across and within chapters is striking the developmentalist the methodologist the feminist the contextualist and the cross culturalist alike will find satisfaction in reading the chapters catherine a surra the university of texas at austin the science of close relationships is relatively new and complex close relationships a sourcebook represents the growing maturity of this multidisciplinary enterprise the volume offers 26 chapters organized into four thematic areas relationship methods forms processes and threats as well as a foreword and an epilogue the volume provides a panoramic view of close relationship research as it enters the 21st century offering highlights from current literature original research practical applications and projections for future research relationship methods includes both qualitative and quantitative chapters relationship forms includes many of the stages types and roles that characterize intimate relationships in a developmental fashion chapters address social networks children s friendships adolescent relationships adult friendships and friendships in later life chapters on multicultural and multiracial relationships and gay lesbian and bisexual relationships illustrate the variety of relationship forms that the science of close relationships must consider the alignments and realignments of traditional family structure are considered in terms of contemporary marriage divorce and single parenting and remarried families relationship processes includes chapters on emotion attachment romantic love sexuality intimacy communication conflict social support and relational maintenance the important topic of gender concludes the section the shadow side of human nature is explored in the relationship threats section with chapters on infidelity and jealousy physical and sexual aggression depression and loss and bereavement a foreword by ellen berscheid sets the stage for this broad ranging collection of chapters steve duck and linda acitelli conclude with an epilogue that provides a new beginning for the science of close relationships
