fully updated in its 2nd edition this comprehensive and accessible book is a one stop introductory text for those entering the field of early childhood studies and early years scholarly and engagingly written it covers all the key contemporary debates from child development language acquisition and play to professional practice health and wellbeing and diversity and inclusion the new edition includes two new chapters on fostering creativity and sustainability it covers the urgent post pandemic need for early childhood practitioners to lead the remedial work for the 2020 generation of babies who lost valuable socialisation opportunities and includes discussion of the current schoolification of early childhood and the pursuit of data as a driver of education and care provision it also examines the impact of health and income inequalities covid 19 global neoliberal policies and brexit on the early childhood landscape an excellent all rounder it covers everything a student of early childhood will need each of the eighteen chapters has at least one global case study and includes reflective exercises topics for discussion assignments and further reading lists throughout the book vital connections are made between theory and practice to help students prepare for a career working with a diverse community of children parents and professionals

the only textbook you ll need to support you through your entire early childhood studies degree this updated edition is comprehensive and current with student voices in every chapter

correct word identification and processing is a prerequisite for accurate reading and decades of psycholinguistic and neuroscientific research have shown that the magical moments of visual word recognition are short lived and markedly fast the time window in which a given letter string passes from being a mere sequence of printed curves and strokes to acquiring the word status takes around one third of a second in a few hundred milliseconds a skilled reader recognizes an isolated word and carries out a number of underlying processes such as the

encoding of letter position and letter identity and lexico semantic information retrieval however the precise manner and order in which these processes occur or co occur is a matter of contention subject to empirical research there s no agreement regarding the precise timing of some of the essential processes that guide visual word processing such as precise letter identification letter position assignment or sub word unit processing bigrams trigrams syllables morphemes among others which is the sequence of processes that lead to lexical access how do these and other processes interact with each other during the early moments of word processing do these processes occur in a serial fashion or do they take place in parallel are these processes subject to mutual interaction principles is feedback allowed for within the earliest stages of word identification and ultimately when does the reader s brain effectively identify a given word a vast number of questions remain open and this research topic will cover some of them giving the readership the opportunity to understand how the scientific community faces the problem of modeling the early stages of word identification according to the latest neuroscientific findings the present research topic aimed to combine recent experimental evidence on early word processing from different techniques together with comprehensive reviews of the current work directions in order to create a landmark forum in which experts in the field defined the state of the art and future directions we were willing to receive submissions of empirical as well as theoretical and review articles based on different computational and neuroscience oriented methodologies we especially encouraged researchers primarily using electrophysiological or magnetoencephalographic techniques as well as eye tracking to participate given that these techniques provide us with the opportunity to uncover the mysteries of lexical access allowing for a fine grained time course analysis the main focus of interest concerned the processes that are held within the initial 250 300 milliseconds after word presentation covering areas that link basic visuo attentional systems with linguistic mechanisms

for students of early childhood studies questions are as important as answers what is childhood is childhood the same in all cultures how do children grow and develop what space do we make for children in our society how do adults approach risk and what does this mean for children can children s play be planned by adults early childhood studies tackles these questions and more it explores the why how and what of studying and working with young children and their families considering how a range of theories can help us to identify useful questions

this is a comprehensive up to date challenging and accessible core text for the early childhood studies course throughout key theories and research findings are highlighted and explored to help link theory and practice it covers the important themes of child development communication wellbeing observation working with parents inclusive practice leadership and research this fourth edition has been fully updated throughout and includes new chapters on children and risk inclusive learning environments play and adults concepts of childhood
