this book constitutes the refereed proceedings of the 18th international conference on computer assisted assessment caa 2015 held in zeist the netherlands in june 2015 the 15 revised full papers presented were carefully reviewed and selected from numerous submissions the papers present current developments in technology enhanced assessment topics covered include automatic item generation computer adapted testing the use of multimedia in assessment e assessment policies

this collection of essays presents an authoritative and penetrating comment on the use of the computer in teaching law the authors have taught and developed instructional materials for

many years they are intimately familiar with the substance of the law as well as with the teaching techniques that have proven successful

avian influenza is a highly contagious viral disease characterized by intense circulation in the wild waterbird reservoirs with periodical introductions into the domestic poultry sector. AI viruses have been the source of devastating economic losses in the poultry industry over the last three decades and have become a major veterinary and public health concern due to their zoonotic potential. The most emblematic illustration of this impact has been the emergence of the HPAI H5N1 virus in southern China in the mid 1990s followed by its continental spread across East and Southeast Asia and the unprecedented epidemics recorded in 2003/2004. More recently from 2014 to 2017 several subtypes of HPAI including H5N1, H5N6, H5N8 emerged in East Asia and spread intercontinentally stressing the crucial role of this geographical hotspot as a source of new HPAI subtypes. The international dimension and the difficulty to effectively control those epidemics highlight the need for a global approach to HPAI surveillance and a comprehensive knowledge on epidemiology and patterns of the disease. This research topic aims at contributing to fill this gap. It includes ten papers which supplement the knowledge of the epidemiology of AI and offer new approaches on control strategies in various regions of the world.

A perfect plan for the perfect score. We want you to succeed on your AP exam. That's why we've created this 5-step plan to help you study more effectively, use your preparation time wisely, and get your best score. This easy-to-follow guide offers you a complete review of your AP course, strategies to give you the edge on test day, and plenty of practice with AP-style test questions. You'll sharpen your subject knowledge, strengthen your thinking skills, and build your test-taking confidence with full-length practice exams modeled on the real test. All the terms and concepts you need to know to get your best score. Your choice of three customized study schedules so you can pick the one that meets your needs. The 5-step plan helps you get the most out of your study time. Step 1: Set up your study program. Step 2: Determine your readiness. Step 3: Develop the strategies. Step 4: Review the knowledge. Step 5: Build your confidence. Topics include reactions and periodicity, stoichiometry, gases, thermodynamics, spectroscopy, light and electrons, bonding, solids, liquids, and intermolecular forces, solutions, and colligative properties, kinetics, equilibrium, electrochemistry, nuclear chemistry, and organic chemistry. Also includes AP Chemistry practice exams. AP, Advanced Placement Program, and College Board are registered trademarks of the College Entrance Examination Board, which was not involved in the production of and does not endorse this product.

The manuals include information on syllabus, regulations, copies of examination papers, and notes by examiners. They also include pass lists.
