this volume contains the invited talks and contributed papers presented at the workshop on testing qcd through spin observables in nuclear targets held at the university of virginia in april 2002 the workshop was proposed in the context of the large number of

experiments that have used polarized deuterons or polarized  $^3\text{He}$  to extract information about the spin parameters of the neutron the motivation for this workshop was to study the effects of the nuclear medium on the spin properties of the bound nucleon and to explore issues in qcd that might be resolved through spin observables in nuclear targets what is the effect of the nuclear medium on the measured asymmetries how have the latest results on the spin structure of the nucleon and the nucleon form factors changed our thinking what advances are anticipated in the development of polarized targets

this constitutes the first volume of the series it indicates the scope of the project and provides a list of sources which will be surveyed in the subsequent volumes as well as provide a guide to secondary literature for further study of indian philosophy it lists in relative chronological order sanskrit and tamil works all known editions and translations into european languages are cited where published versions of the text are not known a guide to the location of manuscripts of the work is provided
