agriculture is an art of raising plant life from the soil for the use of mankind agriculture is the mile stone in the history of human civilization due to agriculture man settled at particular place agriculture is one of the oldest and prime activities of the human being it has remained an important source of land in spite of growing industrialization and urbanization in the world nearly fifty percent working population still engaged in agriculture in developing countries agriculture sector has been a major source of employment and it has contributed to the national economy

political geography has been one of the major growth areas within geography in recent years presenting

a great deal of new research findings new thinking and comprehensive overviews of key aspects of the subject the contributors to this volume review past progress and current trends and discuss the areas where political geographers should undertake future research

agriculture has been the backbone of the Indian economy and it will continue to remain so for a long time Pandey 2009 it is one of the world's largest agrarian economies as the agriculture sector contributed about 18 per cent of the country's GDP 12.8 per cent of the total export in 2012-13 and also provides direct and indirect employment to around 58 per cent of the total work force Agriculture also plays a crucial role in the development of nation

geography is a wide ranging discipline and the number of information sources available is truly enormous these include printed books and journal articles maps satellite photographs archives statistical information and much else one particular problem facing geographers is that when one studies a foreign country information may be available only in the foreign country and difficult to obtain this book discusses the information sources available to geographers

1.1 introduction Agriculture is one of the oldest and most important occupations of man it is generally understood to mean both the cultivation of plants and the raising of livestock hence the origin of agriculture goes back to the beginning of domestication of plants and animals although man plants and animals has always lived together and has remained inseparably interconnected with each other man started domestication of plants and animals several scholars of different disciplines especially from anthropology archeology biology history paleo botany genetics ethnology and other branches of physical sciences have made efforts to unravel this mystery but have not reached a common conclusion as yet they hold different views regarding the time and space origin of agriculture

irrigation dynamics enhancing agriculture in Medak Telangana state explores the transformative role of irrigation in shaping agricultural practices and improving livelihoods in one of Telangana's most agriculturally significant regions through a blend of in-depth analysis case studies and local insights this book delves into the unique challenges and innovative solutions surrounding irrigation in Medak situated in a semi-arid region Medak's agricultural success has long been contingent on the availability and management of water resources this book examines how various irrigation systems ranging from traditional methods like tanks and wells to modern technologies such as drip and sprinkler irrigation are influencing crop yields water conservation and economic outcomes for farmers drawing on fieldwork interviews with local farmers agricultural experts and government officials irrigation dynamics highlights both the successes and limitations of irrigation projects in the region it discusses the impact of governmental initiatives the role of community involvement and the growing significance of sustainable water management practices to combat issues like groundwater depletion and erratic rainfall patterns

includes section reviews and other bibliographical material

current geographical publications CGP is a non-profit service to the scholarly community initiated in 1938 by the American Geographical Society of New York beginning in 2006 the format changed to include the

tables of contents of current geographical journals the journal titles listed link to web pages or pdf scans of the current issue s contents

water bodies on all the four sides surround the globe yet we face water shortage in most nations in our country too not only the per capita water availability is falling drastically even the quality of available water is also fast deteriorating over extraction of ground water has further led to many problems so there is a pressing need to educate the common man about the importance of effective management of water resources geography of water resources fulfils this need this book has been introduced in the syllabus of universities and colleges in india as well as all over the world however much information concerning the water resources management lies scattered in various research publications which are beyond the reach of common man the book therefore presents a comprehensive well illustrated and documented account of the issues concerning water resources management in this various aspects of the scientific management of water resources such as their worldwide distribution and circulation through all spheres of earth water quality and its uses irrigation methods floods droughts watershed management traditional water harvesting techniques water ethics etc have been discussed it is hoped that the book will be of immense help not only to students researchers analysts commentators academicians and policy makers but also for those appearing in various competitive examinations
