as the 19th century philosophical saying goes all truth passes through three stages first it is ridiculed second it is opposed third it is accepted when the parent company abandoned its puck shaped echo dot last year and served up a spherical design comment threads on various forums erupted in laughter amazon isn t the first to consider a spherical audio solution of course the third and fourth gen dots boast the same circumference at their widest but the new variant is almost twice as tall and more imposing than its predecessor think grapefruit rather than stack of coffee coasters the four physical buttons for mic on off action and volume are still present offset from the apex of the dot and there s also a tap to snooze feature which is helpful if you use your dot for alarms and reminders one notable thing about the new design is the elliptical band of plastic that rises to its highest around the power port at the back of the unit it means you shouldn t expect the same omnidirectional sound presentation as in the previous iteration nside is a new chip which promises to make alexa s response times up to twice as fast in our tests the newer dot does

respond quicker the fourth gen echo dot also enters a new low power mode when idle to save on energy consumption ready to explore new features and know your device better read echo dot 4th generation user manual as a comprehensive manual for beginners and seniors to master the echo dot 4th generation features with tips and tricks
